# >> 1994 ENHANCED DATA VARIABLES STUDY DESIGNS

STUDY DESCRIPTION FOR THE AMERICAN NATIONAL ELECTION STUDY, 1992 (Variables V3004 through V7001)

The 1992 American National Election Study 1992 was conducted by the Center for Political Studies of the Institute for Social Research, under the general direction of Warren E. Miller, Donald R. Kinder and Steven J. Rosenstone. Santa Traugott was the Director of Studies for the National Election Studies. Giovanna Morchio was the Study Manager, overseeing the study from very early planning stages through release of the 1992 data collection.

This is the twenty-second in a series of studies of American national elections produced by the Political Behavior Program of the Survey Research Center and the Center for Political Studies, and it is the eighth traditional time-series study to be conducted under the auspices of National Science Foundation Grants (SOC77-08885, SES-8341310, and SES-8808361) providing long-term support for the National Election Studies. Since 1978, the National Election Studies have been designed by a national Board of Overseers, the members of which meet several times a year to plan content and administration of the major study components.

Board members during the planning of the 1992 National Election Study included: Thomas Mann, The Brookings Institution (Chair); Stanley Feldman, University of Kentucky; Morris Fiorina, Harvard University; Mary Jackman, University of California at Davis; Gary C. Jacobson, University of California, San Diego; David Leege, Notre Dame University; Douglas Rivers, Stanford University; Virginia Sapiro, University of Wisconsin; John Zaller, the University of California at Los Angeles; Warren E. Miller, Arizona State University, ex officio; Donald R. Kinder and Steven J. Rosenstone, University of Michigan, ex officio.

As part of the study planning process, a special planning committee was appointed, a pilot study conducted, and stimulus letters sent to members of the scholarly community soliciting input on study plans. David Leege chaired the 1992 Study Planning Committee which included from the board Stanley Feldman, Mary Jackman, Douglas Rivers, Virginia Sapiro, and three other scholars: Paul Beck, Ohio State University; Jack Citrin, University of California at Berkeley; and Leonie Huddy, State University of New York at Stony Brook.

A pilot study was carried out in June-July of 1991 for the purpose of developing new instrumentation for the 1992 Election Study. New items were tested in the area of ethnic politics, gender consciousness and social altruism. It should be noted that the 1991 Pilot Study was simultaneously

the 1990-1991 Panel Study on the Political Consequences of War. Data from the 1991 Pilot Study are available through the Inter-university Consortium for Political and Social Research (ICPSR 9673). Results from the pilot study (summarized in "List of 1991 Pilot Study Reports,") were used by the Planning Committee in formulating recommendations to the Board about study content for the 1992 Pre- and Post-Election Surveys. Copies of the Pilot Study reports may be obtained by contacting the NES project staff, at the addresses given below.

NES Project Staff Center for Political Studies Room 4026 Institute for Social Research University of Michigan Ann Arbor MI 48104

>> 1994 STUDY DESIGN, CONTENT AND ADMINISTRATION

## STUDY DESIGN

The 1992 National Election Study entailed both a pre-election interview and a post-election re-interview. Approximately half of the 1992 cases are comprised of empaneled respondents who were first interviewed in the 1990 National Election Study and later in the 1991 Political Consequences of War Study. The other half of the cases are a freshly drawn cross-section sample. (Details of the sample design are given in "Sample Design of the 1992 Pre- and Post-Election Study", below.)

The panel component of the study design provides an opportunity to trace how the changing fortunes of the Bush presidency, from the high levels of approval at the start of the Gulf War, through the decline after the onset of a recession, affected voting in the November 1992 presidential election. It also permits analysts to investigate the origins of the Clinton and Perot coalitions as well as changes in the public's political preferences over the two years preceding the 1992 election.

Altogether, 2485 citizens were interviewed in the 9 weeks prior to the November 3, 1992 election. [Note: The original study Staff release of the 1992 National Election Study in April, 1993 contained 2,487 cases. See the note on "A Note on Deletion of Cases", below, for further information about the two cases deleted from this edition of the collection.] To permit analysis of the impact of the unfolding election campaign, a random half of the sample was released to the field on September 1 and the other half on October 1st. 1359 of the pre-election interviews were conducted with panel respondents; 1126 with cross-section respondents. In the weeks following the election, 2255 pre-election respondents were reinterviewed; 1250 panel, 1005 cross-section. Further details of the administration of the surveys are given in "Study Administration", below.

The two components of the study -- the panel and the new cross-section -- were designed to be easily used together to create a combined nationally representative sample of the American electorate. Several case weights are provided with this data set.

- V3008 (which incorporates sampling, nonresponse and post-stratification adjustments) should be used when analyzing the combined sample (the panel and the new cross-section respondents).
- V3009 (which incorporates sampling, nonresponse and post-stratification adjustments) should be used when analyzing the panel respondents alone.
- V7000 (which corrects for panel attrition and the aging of the panel respondents, but does not incorporate sampling, nonresponse and post-stratification adjustments) should be used when comparing either the panel respondents or the combined panel and new cross-section respondents to previous (unweighted) National Election Studies data collections.

See "Sample Design of the 1992 Pre- and Post-Election Study", below, and the documentation for V3008, V3009, and V7000, for further information.

## STUDY CONTENT; SUBSTANTIVE THEMES

The content for the 1992 Election Study reflects its double duty, both as the traditional presidential election year time-series data collection and as a panel study. The substantive themes represented in the 1992 questionnaires include:

- \* interest in the political campaigns; concern about the outcome; and attentiveness to the media's coverage of the campaign
- \* information about politics
- \* evaluation of the presidential candidates and placement of presidential candidates on various issue dimensions
- \* partisanship and evaluations of the political parties
- \* knowledge of, contact with, and evaluation of House candidates (including questions on how their Representative voted on the Persian Gulf War resolution and whether he/she was implicated in the House banking scandal); opinions on term limitations
- \* political participation: turnout in the Presidential primaries and in the November general election; other forms of electoral campaign activity
- \* vote choice for President, the U.S. House, and the U.S.

Senate, including second choice for President

- \* personal and national economic well-being, with particular attention to the impact of the recession
- \* positions on social welfare issues including: social security; government health insurance; federal budget priorities, and the role of the government in the provision of jobs and good standard of living
- \* positions on social issues including: abortion, the death penalty; prayer in the schools; the rights of homosexuals; sexual harassment and women's rights
- \* racial and ethnic stereotypes; opinions on school integration and affirmative action; attitudes towards immigrants (particularly Hispanics and Asians); opinions on immigration policy and bilingual education
- \* opinions about the nation's most important problem and the most important issues discussed during the local congressional campaign
- \* political predispositions: moral traditionalism;
  patriotism; political efficacy; egalitarianism;
  individualism; trust in government; racial prejudice;
  and feminist consciousness
- \* social altruism and social connectedness
- \* assessments of U.S. involvement in the Persian Gulf War and of U.S. foreign policy goals
- \* feeling thermometers on a wide range of political figures and political groups; affinity with various social groups
- \* detailed demographic information and measures of religious affiliation and religiosity

Congressional Ballot Cards, Candidate Lists, and Candidate Numbers

In the usual NES Post-Election survey, and for 1992, in the Pre-Election survey as well, respondents are asked several questions about their particular Congresspersons and Senators. Interviewers pre-edited questionnaires to fill in the names appropriate for the state and congressional district in which the respondent was living (or was living during the pre-election interview). Each candidate and Senator is assigned a unique number that reflects his or her incumbency status and party. (See Appendix 5: Candidate Number Codes and Lists.) Particular questions in the survey require the insertion by the interviewer during pre-editing of the names of candidates. See, for example, post-election question B1, which includes feeling thermometers for the various candidates. The Candidate Lists used by the interviewers, which show which candidates are associated with which congressional district and with which numbers

they are tagged, can be found in Appendix 5.

Asking questions about incumbent candidates is somewhat more problematic in a year when redistricting occurred, and for the Pre-Election survey there is the additional complication that a number of states held their Congressional primaries after the Pre-Election field work had started. Further details can be found at the documentation for Pre-Election questions J10-J11.

Handling of Congressional Incumbency Where Redistricting has Occurred

Throughout, whenever the word "incumbent" is used, its referent is a representative who was a member of the 102nd Congress; i.e., the Congress in session prior to the November 1992 General Election. Due to redistricting as a result of the 1990 U.S. Census, any given incumbent's district for the 103rd Congress may consist of a fairly different geographical area from the area covered by the district prior to the boundary changes. Therefore, prior to 1992, the "incumbent" may or may not have been the representative for the particular piece of geography (the sample segment or census tract) in which the respondent lives. For each sample segment, we have included in the dataset its 1992 congressional district number, v3019, and its congressional district number in 1990, v3020. By comparing the two, it can be determined whether the "incumbent" in question was actually the respondent's incumbent prior to the 1992 general election.

"Lagged" Measures Obtained from 1990 and 1991 Interviews

Slightly more than half of the respondents in the 1992 study were also interviewed in 1990 and 1991. Therefore, all of the variables associated with the 1990 Post-Election Study (ICPSR 9548) and the 1991 Political Consequences of War Study (ICPSR 9673) are available for use as "lagged" measures in the current release of this collection.

# STUDY ADMINISTRATION

Pre-election Study Release of Sample

To permit analysis of the impact of the unfolding election campaign and to minimize the relationship between interviews taken late in the campaign period and the difficulty of obtaining an interview, NES divided the Pre-Election study sample into two random parts. Administration of the first random half occurred between September 1 and September 30; the second half between October 1 and October 31st, with the first two days of November as "cleanup." The two part division applied to both panel and cross-section samples.

Note that the study period began before Labor Day, the traditional start of the Election Studies (and Presidential campaigns). The combination of a late date for Labor Day (Sept. 7) and an early date for Election Day (Nov. 3rd) would have shortened our standard field period by about a week, which would have reduced the overall response rate.

## Sample "Replicates"

To more closely tailor the field effort to the actual sample performance during this study, both parts of the sample (panel and cross-section) were randomly subdivided into five replicates, each of which is a proper, random subsample of the NES sample. Replicates 1 and 2 were considered the "base sample," certain to be released, with three replicates being held in reserve to be released for fieldwork October 1, 1992, if it was decided they were needed. Replicates 4 and 5 were released at that time.

Survey Modes: Design and Implementation

One of the administrative problems in fielding a panel study is that respondents have had an intervening period of time in which to relocate, perhaps at some remove from areas where field staff is maintained. Additionally, some of the SRC sample primary areas were replaced between 1990 and 1992, and therefore potentially some of the 1990 Election Study respondents lived in areas where SRC interviewers were no longer on staff. We estimated that between 50 and 125 respondents might have moved to areas in which SRC did not have interviewers, or might be living in their 1990 residence, in a place where SRC no longer maintained interviewing capability. (As it turned out, the total number of panel respondents that we interviewed who were "out of range" for either of these two reasons was 43.) It was our intention to interview as many panel respondents as possible, but we did not want to incur the additional costs associated with interviewer travel. Therefore, we prepared a truncated version of both Pre- and Post-Election Survey questionnaires, (the "Short-Form") to be administered over the telephone to those panel respondents who had moved out of range.

Interviews, both in the Pre- and in the Post Election surveys, were also administered over the telephone to many respondents, both panel and cross-section, who did not meet the "panel out-of-range" criteria for telephone interviewing. The mis-implementation of the design also entailed the inappropriate use of the full-length questionnaire. Table 7, below, sums up the situation. In total, 86 percent of the interviews (91 percent before the election and 81 percent of those conducted after the election) were administered as mandated by the study design: face-to-face with the full length questionnaires or by phone for those panel respondents who moved out of range.

## A NOTE ON DELETION OF CASES

In putting together the panel file, study staff examined with particular attention the work of one interviewer and decided that his entire production for 1990 was suspect. Two panel reinterviews in 1992 were thus based on 1990 interviews which were very likely faked in whole or very large part. The decision was made to eliminate these interviews from the 1992 dataset (and also from the panel file). Consequently, the total N for the ICPSR release of

these data is 2485 as compared with a N of 2487 in the Study Staff release of the 1992 Cross-Section data. The tables found in this introduction were produced using the original Study Staff release of the data and reflect the original N of 2487.

Table 7: Mode and Form Administration in the 1992 Pre-/Post Election Studies

## Total Respondents

| Mode         | Questionnaire | Pre-Election |        | Post-Election |        |
|--------------|---------------|--------------|--------|---------------|--------|
| Face-to-face | Full          | 2208         | 88.8%  | 1781          | 79.0%  |
| Phone        | Short         | 154          | 6.2%   | 190           | 8.4%   |
| Phone        | Full          | 125          | 5.0%   | 284           | 12.6%  |
|              | Total         | 2487         | 100.0% | 2255          | 100.0% |

- A. The 1155 Pre-election respondents in this category include 16 Panel interviews taken F-T-F using the Spanish version of the questionnaire.
- B. The Pre-election respondents in this category include 1 Spanish language panel interview, taken by phone.
- C. The pre-election total includes 4 Spanish version questionnaires taken F-T-F.
- D. The 5 cases in the Pre-election category consist of 1 F-T-F and 3 Phone short-form, plus 1 Spanish language cross-section case.

# >> 1994 SURVEY FORMS: DESIGN AND IMPLEMENTATION

There were two[5] forms of both the Pre- and the Post-Election Study questionnaire: a short form, to be administered over the phone to panel respondents who were "out of range," as described above, and a standard, or full-length questionnaire to be administered to everyone else. The questions on the short-form were a subset of those on the full length questionnaires whose 70 minutes in length was thought to be unacceptably long for a telephone interview.

50 minutes worth of content was selected for the short form, both Pre- and Post-Election Surveys. The criteria for inclusion were that the questions were "core," i.e., questions part of the NES time-series, as opposed to recently piloted or topical items, or that they related to the focus of the 1991 Political Consequences of War Study. We decided not to repeat most of the demographics items for the approximately 100 panel respondents we expected would be interviewed with the short form, relying instead on their responses in the 1990 survey. Additionally, some congressional content was deleted, because of the difficulty in assigning respondents over the phone to the newly drawn congressional districts.

Because we estimated the number of cases affected to be few and randomly scattered across the country, we did not design the instrument for the telephone. Except for the income question, we made no adjustments to the questionnaire for the difference in mode. In general, interviewers were expected to read response options to the respondent and to repeat them as necessary until they were clear to the respondent.

All interviews with a short form questionnaire, except for Spanish language, and including "legitimate" or "out-of-range" panel respondent interviews, have been designated as partial interviews, in the result code variables for the Pre- and Post-Election Studies (v3033 and v5012).

# EVALUATION OF PROBLEMS IN STUDY IMPLEMENTATION

The problems mentioned above did not become fully evident until coding was virtually completed, in the last week of February. At its March 1 meeting, the NES Board of Overseers, to whom these problems were reported, instructed the Principal Investigators to assess the significance of these problems with respect to data quality. This work was carried out by the Principal Investigators and members of the Study Staff in consultation with Board members, SRC methodologists and Center for Political Studies personnel as appropriate. The findings are available in NES Technical Report No. 43, available from NES Project Staff.

As the Technical Report documents in detail, the inappropriate use of the telephone and the short-form questionnaire thankfully had only a negligible impact on the quality of the 1992 data. When the short-form questionnaire was used, it of course generated missing data on those items that appeared on the full-length questionnaire but not on the short-form. But this resulted in a very slight increase (less than .05 percentage points) in the standard errors of

the affected variables. The pattern of missing data (from use of the short-form questionnaire) is unrelated to the demographic or political characteristics of respondents. Instead, interviewers turned to the short form when it appeared they would have difficulty securing an interview for other reasons having to do with the field administration of the study. The same holds for use of phone instead of face-to-face interviewing. Respondents interviewed over the phone are politically indistinguishable from those interviewed face-to-face. Attributes of the study administration, not attributes of the individual respondents, are associated with the propensity of interviewers to conduct some of their interviews over the phone. Finally, although some survey questions perform differently across the two modes of interviewing, the distribution of responses and the relationship among variables are substantively the same among phone and face-to-face respondents.

## RESPONSE RATES

The Pre-Election study response rate for the cross section sample was 74.0%. Recalculating the response rate to eliminate 4 short-form, cross-section interviews (partials) results in a response rate of 73.7%[6]. For the panel sample, the response (or reinterview) rate is 77.7% when partials, or short form interviews, are included, but drops to 69.2% when they are excluded. Post-Election reinterview rates are 91.8% for the panel, including partials, and 85.0% excluding the partial or short-form interviews. The cross-section Post-Election reinterview rate was 89.3% including 4 partials; 88.9% excluding them. These calculations do not differentiate between face-to-face and telephone modes of interviewing.

## INTERVIEW COMPLETION RATE

Table 8 lays out the number of interviews taken for each week elapsing after the Nov. 3 General Election. In 1992, 25.8% of the interviews were completed in the first two weeks after the election; 53.1% in the first four weeks. For comparison, in 1988, 55% of the interviews were taken in the first two weeks after the election, and 82% in the first four weeks.

Table 8: Number of and Cumulative Percent of Interviews
Taken in the Post-Election Study by Week of Interview

| DATES          | NUMBER OF<br>INTERVIEWS | CUMULATIVE<br>NUMBER OF<br>INTERVIEWS | CUMULATIVE<br>PERCENT OF<br>INTERVIEWS |
|----------------|-------------------------|---------------------------------------|--|
| Nov. 4-Nov.10  | 237                     | 237                                   | 10.5%                                  |
| Nov.11-Nov.17  | 344                     | 581                                   | 25.8                                   |
| Nov.18-Nov.24  | 372                     | 953                                   | 42.3                                   |

# VARIABLES SUPPRESSED FOR REASONS OF CONFIDENTIALITY

Starting with the 1986 Election Study, NES has released occupation code variables in somewhat less detail than in years past. This dataset includes a two-digit code with 71 categories corresponding to Census Bureau occupational groupings. Those who need the full occupation code for their research should contact the NES project staff for information about the conditions under which access may be provided.

Similarly, the National Election Studies have not included information for census tracts or minor civil divisions since 1978. Permission to use the more detailed geographic information for scholarly research may be obtained from the Board of Overseers. More information about this is available from NES project staff.

Coding of the new religious denomination variable is in some cases based on an alphabetic "other, please specify" variable. This variable is restricted for reasons of confidentiality, but access may be provided to legitimate scholars under established NES procedures.

## >> 1994 OPEN-ENDED MATERIALS

Traditionally, the National Election Studies have contained several minutes of open-ended responses (for example, the candidate likes and dislikes). These questions are put into Master Codes by the SRC coding section. Other scholars have developed alternative or supplemental coding schemes for the questions (for example, the levels of conceptualization, released as ICPSR 8151). The Board of Overseers wishes to encourage these efforts but in ways which respect the NES and SRC obligation to protect the privacy and anonymity of respondents. Circumstances under which individuals may have access to transcribed versions of these questions have been worked out and those interested should contact the NES project staff for further details.

## >> 1993 STUDY DESCRIPTION

1993 SURVEY CONTENT AND OBJECTIVES

Overview

The 1993 Pilot Study is the second of a projected three wave study. The 1993 wave was in the field approximately one year after the first wave of the study which is the 1992 Pre- and Post-election study, from which the 1005 cross-section respondents were

selected for reinterview in 1993. We anticipate that respondents will be interviewed for a third time as part of the 1994 Election Study. The three-wave study is designed to exploit the special circumstances of the 1992-94 elections: a minority president who is struggling to forge a majority coalition in the face of a strong third-party challenge, and the replacement in 1992 of fully one-quarter of the House of Representatives. Each presents an unique opportunity which we propose to seize through projects that are directed at understanding how electoral coalitions form (and decay) and how new members of the House secure their districts. Additionally, the Pilot Study fulfills its role as the vehicle for testing and developing new instrumentation for the 1994 National Election Study.

#### The Clinton Coalition

The 1994 elections present both a substantial opportunity and risk to the Democratic Party. The stakes are high: the party needs to consolidate the gains of 1992 and build a majority coalition. In some ways, the Clinton Administration began this political task from a position of extraordinary weakness. Although Bill Clinton captured a clear majority of the electoral votes, he entered the White House without a clear mandate, winning just a shade over 43 percent of the popular vote. Indeed, early interpretations of the 1992 election have emphasized less that Clinton won the Presidency and more that Bush lost it.

At the same time, whether in possession of a popular mandate or not, Clinton came to Washington with significant legislative initiatives in mind. He introduced major proposals on taxes and spending. He appears determined to grapple with health care, not to tinker with it but to reform it fundamentally. Clinton's election has of course meant the return of unified government to the national scene, though early readings suggest that Republican unity in the Senate and Democratic defections from Clinton's proposals may undermine the promises of unified control. Still, there is the prospect of real change: major proposals, passed into law, with the consequences broadly felt throughout the country.

From the perspective of coalition maintenance, this is a special political moment, one portentous for the future electoral success not only of the Democratic and Republican Parties but for third party challenges as well (a point we take up immediately below). We want to assess how all this consequential and high-profile political churning intrudes upon Clinton's capacity to hold together and expand his political coalition over the first critical years of his administration. How have each of Clinton's major policy initiatives added or subtracted support from his political coalition?

The 1993 Pilot Study re-asks a number of items from the 1992 Study, and adds others, to give as complete

a picture as possible of how Clinton is faring with the coalition which elected him. These items are:

Evaluation of economy (V7238-7260)

Approval ratings of several aspects of Clinton's performance in office (V7101-7120)

Thermometer ratings of Bill and Hillary Clinton (V7130-7138)

Who would R vote for if the election were held today (V7161)

Liberal-conservative placement of Clinton (V7209-7216)

Traits and affects batteries (V7226-7230, V7267-7270)

Opinion on NAFTA (V7261-7266)

Opinion on budget deficit (V7315-7323)

From a slightly different angle, the 1992-1994 study, of which the 1993 Pilot Study is the middle piece, is also directed at more fully understanding the Perot phenomenon. That Perot's popularity is a political phenomenon is hardly open to question. Following an eccentric if not quixotic on and off and on again campaign, and in spite of the formidable hurdles which the American system places before third-party candidates, Perot won nearly one in five votes cast in 1992. In this respect, Perot did better than all but one third party candidate since the Civil War split the nation.

Perot's pockets are deep enough to finance a continued high public profile. Perot's likely continued presence quickens interest on our part in understanding the maintenance and decay of his coalition as well. Even without the trappings and formal powers of the Presidency, Perot, like Clinton, faces the identical political problem of somehow hanging on to his supporters while recruiting still others as they become disenchanted with the alternatives.

To what extent does Perot's continued support rest upon an ideological base? Or upon disenchantment with business as usual, a continuing protest against politics itself? Or upon the failure of government to deal with the economy or the budget deficit? Or should the Perot movement be understood in more personal terms, dependent upon continuing public displays of a winning style and personality? Or, finally, does it turn on contempt for the alternatives?

A number of items which attempt to tap the sources and strength of Perot support have been included in the study. They include:

- Ross Perot and United We Stand feeling thermometers (V7131, V7149, V7150)
- Liberal-conservative placement for Perot (V7220-7221)
- Traits and affects batteries (V7231-7235, V7271-7274)
- Attitudes toward political parties ((V7295-7296, V7305, V7366-7370)
- Attitudes toward media, special interests, government in Washington (V7306-V7308)
- Membership in, contact by United We Stand America (V7312-7314)

To examine the maintenance and decay of electoral coalitions, we have empaneled the cross-section respondents to the 1992 NES Post-Election Survey, interviewing them again in the fall of 1993, and proposing to interview them one final time in the weeks following the 1994 midterm election. The panel design is a powerful one for several reasons. First, an absolute requirement for a study of electoral coalitions is the successful identification of Clinton, Perot, and Bush voters (and non-voters as well). For Clinton, the immediate political challenge has several aspects: to maintain the support of those who voted for him in 1992; to build support among those who voted for his opponents, especially those who went Perot's way in 1992; and to awaken interest and eventually support among those millions who, in 1992, voted for no one at all. Attempting to assess vote a year or more away from the election, as we would have to do absent a panel design, invites error of the most pernicious sort. For example, citizens who in fact voted for Clinton in 1992 but who have since recoiled in horror at what he has done, might now report that they had voted for Bush. To get this project off the ground, we need to know what citizens did on election day 1992, and to know that, we treat the 1992 NES Survey as a first wave of a panel.

Second, coalition maintenance and decay may be a classic case of little detectable movement at the aggregate level obscuring lots of off-setting movement at the individual level, as citizens move in and out of various partisan camps. Determining the fluidity of the Clinton and Perot coalitions can be uncovered with panel evidence.

Finally, panel data will also permit the testing of alternative theories of political learning. Whether such theories come from formal, statistical formulations, as in Bayesian models, or from various psychological theories, a claim held in common is that what people absorb from their political experiences depends on their prior beliefs and sentiments. Learning is conditional on what citizens already know. This means that we must have baseline

readings on citizens before Clinton's coming to power. The 1992 NES survey of course delivers handsomely on precisely this point. These data tell us what citizens thought in 1992 about the necessity of new taxes, the seriousness of the federal budget deficit, the need for health care reform, the conditions under which women should be permitted to have abortions, whether gays should be allowed to serve in the armed forces, the responsiveness of government institutions, the performance of the major parties, and much, much more. And this means that, having returned to these same citizens in 1993 and 1994, we will be in excellent position to understand in a fine-grained way how electoral coalitions are held together and how they fall apart.

# Securing the District

Due to a combination of re-districting, scandal, and retirement, the 1992 House elections resulted in a dramatic turnover in personnel. More than one-quarter of the House was replaced: 110 new Representatives won in November, the most in nearly half a century This turnover provides an the opportunity of examining the ways in which new members of the House secure their districts against challenge in the next election. For the first time, we can examine the relationship that develops between representatives and their constituents in its formative stages during the first term in office.

The advantages of incumbency have been a central theme of research on House elections and on the institution itself. Defections from party-line voting in House elections have increasingly favored the incumbent. These days, incumbent Representatives almost always win, often by overwhelming margins. Despite all the talk about anti-incumbent feelings in 1992, fully 93 percent of House incumbents seeking re-election were returned to office. Taking into account primary election defeats, this figure remains an impressive 88 percent. On the other hand, this re-election rate was the lowest since the Watergate election of 1974 and fell just 2 points short of being the lowest in forty years. Moreover, it does not take into account the unusually large number of representatives who choose not to run again in 1992, some of whom certainly would have been defeated. It is also true that winning incumbents were much more likely to find themselves in close contests in 1992 than in previous years. Still, in the face of re-districting, scandal, and widespread popular disdain for the institution of Congress, incumbents seeking re-election were rarely turned away. Success at under these highly unfavorable conditions testifies to the continuing electoral benefits of incumbency.

We know that incumbent advantage accrues quickly: it is well-established, perhaps established in full, by completion of the first term in office. Indeed, a common measure of incumbency advantage is the "sophomore surge:" the gain typically registered in the representative's first re-election try. What happens

during these first two years? How do newly elected members of the House consolidate their victories? Is the incumbency advantage secured as a result of the actions that members of Congress engage in during their first term of office, or is it secured as a result of their first re-election campaign? As it is typically investigated, the problem is impossible to unravel. The data we rely on are always investigated in the context of an election campaign. Moreover, it is precisely those incumbents who are deepest in trouble at election time who work their district the most.

The study we propose here provides a clean test of the inherent (as opposed to campaign-related) advantages of incumbency. Many new members are precarious, and most no doubt believe that they are. Under these circumstances, do in fact new members of the House concentrate their attention and activities on their home district during their first term and, most important, do their constituents take notice?

As a general matter, we know next to nothing about the impressions created by Representatives -- whether they are new to Congress or not--between elections. What in fact happens to the visibility of newly-elected representatives over the critical period of their first term? Do constituents tend to forget about their representatives between elections, and then learn about them again as the next campaign takes off? Or do constituents learn more and more about their representatives as the first term proceeds, a response to what Richard Fenno has called "the permanent campaign?"

The 1992-1993-1994 panel data provide sharp tests of the alternative theoretical interpretations of the incumbency advantage. Of the 1005 respondents who make up the 1992 NES post-election cross-section, over a quarter (n=275) resided in congressional districts that sent a new member to Congress in 1992. Thus, the high turnover that occurred in the House in 1992 provides sufficient numbers of respondents to support detailed analysis of the processes by which newly-elected representatives (compared to returning incumbents) shore up their support during their first term in office. The panel design provides efficient measurement of the evolution of new Representatives' reputations among their constituents. With panel evidence in hand, patterns of learning and forgetting and alterations in trust and support, conditional on the views held by constituents before their Representatives went off to Washington, can be traced.

The survey included extensive content on evaluations of incumbent members of Congress. Much of the content repeats the now-familiar congressional batteries. Also, the 1994 study included an experiment in the layout of the Ballot Card. Respondents were presented alternative versions of the ballot identical in content, but different in design. For sample ballots please contact the NES Study staff (note: the ASCII text format of this file does not allow

inclusion of Ballot card design within the 1994 codebook).

Recall of candidates running in "this district this past November" (V7121-7129)

Thermometer rating of incumbent; recall what job he/she holds? (V7136-7137)

Likes/dislikes of incumbent (V7162-7173) Contact with U.S. Representative incumbent (V7174-7183)

Vote for Representative (V7184-7185)

Approve of way Representative handling job (V7191-7194)

Does R's representative support Clinton's legislative proposals (V7195-V7199)

Did he/she vote for Clinton's deficit reduction package (V7200-7202)

Does Representative do a good job of keeping in touch (V7203)

Liberal-conservative placement of Representative (V7222-7223)

Developing New Instrumentation

The design of the 1993 Pilot Study replicates one NES successfully implemented in 1990-91-92 to assess the political impact of the Persian Gulf War. In this design, the odd- year Pilot Study serves double duty as a platform both from which to conduct the second wave of the panel and to carry out the research and development work for the subsequent year's election study.

One section of development work (variables 7371-7422) follows a proposal made by Laura Stoker, to study the interest basis of political attitudes. Questions are asked about perceived interests of several groups (wealthy, poor, middle class, blacks, whites), as well as self and national interest, in three domains:

National health insurance (V7374-7384) Affirmative action (V7405-7422) School choice (V7385-7404)

Half of the respondents received the questions about affirmative action in lieu of the school choice questions while the other half got the school choice questions instead of those relating to affirmative action.

Douglas Strand proposed a number of questions relating to attitudes toward homosexuals and about policies affecting homosexuals. The attitudes toward homosexuals are measured by asking Rs whether:

Parents should encourage boys to be masculine and girls to be feminine (V7289-7294)

Homosexuality is a matter of choice (V7336-7339)

Homosexuals try to seduce non-homosexuals (V7340-7343)

The idea of homosexuality disgusting or uncomfortable (V7348-7351)

He/she worries about getting AIDS or other disease from homosexuals (V7348-7351)

Homsexuality is unnatural (V7352-7355)

Homosexuals have too much/too little influence (V7356-7360)

Homosexuality is against the will of God (V7361-7365)

Attitudes towards policy relating to homosexuals are measured by these items:

Favor or opppose laws protecting homosexuals from job discrimination (V7324-7327)

Whether homosexuals should serve in military (V7328-7331)

Should homosexual couples be allowed to adopt children (V7332-7335)

A number of experiments in the survey response also are included in the Pilot Study. These include:

Budget package vs. deficit reduction package (V7200)

Experiment in wording of the vote choice for Representative question-reading candidate name as well as party, versus reading only party labels (V7185, V7283)

Reversing order of self versus political object placement on liberal conservative 7-pt scale (V7205-7219)

Certainty probe on liberal-conservative scale; self and other objects (V7208, V7211, V7216, V7219, V7221, V7223)

Experiments on nature of followup: strength versus amount (lot, little) (V7263, V7266,  $V9\7291$ , V7294, V7300, V7308)

Experiements on length of followups: short versus

verbose ((V7102-7104, V7349-7351) order in which groups were presented in the interest basis of politics section was reversed for half the sample (V7374-7422)

# STUDY CHARACTERISTICS AND ADMINISTRATION

The 1993 Pilot Study was a telephone reinterview of (cross-section) respondents to the NES 1992 Pre- and Post-Election Study. Interviewing was carried out by the Telephone Facility of the Survey Research Center, the Institute for Social Research.

Field period was Sept. 23 --Nov. 24, 1993
Average interview length was 42 minutes
750 interviews were taken, including 4 partials
Response rate was 74.6 percent; cooperation
rate was 88.4 percent (See below)
The study was CATI -- there is no paper version
of the Questionnaire

# Response Rate Calculations

This is a Panel Study, and response rate calculations are somewhat different than those for an initial contact study, primarily because because there is no "non-sample" category. Every one of the 1005 persons we originally interviewed in the 1992 Post -election study is, by definition, eligible for a reinterview. (1992 respondents who were interviewed in the Pre-election study only were not part of the 1993 study sample.) We reinterviewed 750 of these 1005 respondents to the 1992 study, for a strictly construed reinterview rate of 74.6 percent. 98 respondents from the 1990 Study refused to be reinterviewed. An additional 157 respondents could not cooperate because they were ill or for some other reason physically unable to complete a telephone interview; because they were not locatable; or because they did not have a telephone and did not respond to our requests to call the Telephone Facility. A cooperation rate, which excludes the 157 noninterview cases, is calculated at 88.4 percent.

The Telephone Facility and NES staff collaborated on a several step plan to boost response rate and to reduce panel attrition. There were several mailings to the respondents, including a thank-you letter, a respondent report, and an advance contact letter enclosing a small clock as an incentive. The field period was long enough to provide time to track respondents. Persuasion letters were sent, to those who were initially reluctant to participate. An 800-number was set up for respondents to call for further information about the study. In the late stages of interviewing, monetary incentives were offered to 42 reluctant respondents. Finally, the study benefitted from having a highly committed and skilled cadre of interviewers.

Interviewer training, pretesting and debriefings

The first draft of the questionnaire was pretested by picking at random telephone numbers from local (not Ann Arbor) telephone exchanges. 30 interviewers were taken in this way by a mixture of experienced and new interviewers. Study staff "debriefed" the interviewers on their own and respondents' reactions to each question in the pretest instrument. These pretest interviews were also tape recorded, and new questions were "behavior coded" for more quantitative indications of problems with these questions. A separate debriefing was held for the behavior coders. Information from both of these debriefings (which were contradictory on certain points) was incorporated into the production instrument.

Standard practice for an SRC study calls for a study guide, listing study objectives and procedures, as well as any special information that interviewers need to know about specific questions. (A copy of this document, as well as study guides for all previous studies, is available from NES Project Staff.) Prestudy conferences with all interviewers and NES staff and PIs gave an opportunity to train on specific questions, and answer concerns of interviewers. Midway through the interviewing, NES staff and PI met with interviewers to hear directly from them how the study was proceeding and how, in their opinion, new sections of the questionnaire were working. A full report of this debriefing is included in Appendix A.

# Forms Assignment

When the Board began planning for this study, we were budgeted for about 40 minutes of interview time, and a number of experiments were proposed. In order to meet these objectives, respondents were randomly assigned to one of four forms. (Variable 7003 records the form assignment.)

# Randomization

Responses to survey questions can be affected by questions that have been asked previously in the survey. There are many survey questions, like the feeling thermometers, where lists of objects are presented for evaluation by respondents. It is extremely difficult, if not impossible, to identify a single order for the items which eliminates response effects. An alternative is to randomize the order in which items on a list are presented to respondents. The CATI system used by the SRC Telephone Facility, AUTOQUEST, has a randomizing function and this was implemented for the feeling thermometer (variables V7130-7136, 7138-7141). No information as to the order in which the thermometer items were asked for a given respondent was preserved.

Congressional District Identification for Movers

One of the goals of the multiple advance mailings

to the 1992 respondents was to get change of address information from local post offices. When we got information that a respondent had moved, and to where, study staff attempted to determine, from what was known of the respondent's new location, in which congressional district the respondent now lived. The name of the member of Congress for that district was then substituted throughout the questionnaire for the name of the member of Congress who was elected in the district in which the respondent lived at the time of the 1992 interview. In a few cases, the information that the respondent had moved was not elicited until the interview was actually underway. When this happened, the interview continued, using the original member of Congress.

Organization and Documentation of the Dataset

Data for all of the variables and all of the cases in the first wave of the panel, i.e., the 1992 Pre- and Post-election Study, are included in this dataset. Please note that this means that although there are 750 respondents in the 1993 Pilot Study, there are actually 1005 records in the Pilot dataset; one for each (cross-section) respondent to the 1992 Post-election Study. Respondents in the 1992 study who were not re-interviewed in the 1993 wave are assigned missing data codes on the 1993 variables.

Documentation for the 1993 Study is separate from the documentation (i.e., codebook) for the 1992 Election Study. Since the variable numbers for the 1992 wave of the study re the same in the Study Staff and the Consortium Releases of the 1992 Election Study, users may use whichever version of that documentation they now have. Users who do not have any 1992 documentation available to them should specify that fact when ordering. The documentation for the 1993 wave is hard-copy, but users may also receive the documentation as WordPerfect 5.2 files or as an ASCII text file.

The dataset is an ASCII, raw data file accompanied by SAS/SPSS control cards. There is no OSIRIS dataset.

Documentation and dataset are available through the Inter-university Consortium for Political and Social Research. ICPSR User Services may be contacted by phone (313.763-5010) or by Internet E-Mail (icpsr\_netmail@um.cc.umich.edu) for further information.

>> 1993 SAMPLE DESIGN: TECHNICAL MEMORANDA

1994 NATIONAL POST-ELECTION STUDY SAMPLE DESIGN

STUDY POPULATION

The study population for the 1994 National Post-Election Study (NES) is defined to include all United States citizens

of voting age on or before the 1994 Election Day. Eligible citizens must have resided in housing units, other than on military reservations, in the forty-eight coterminous states. This definition excludes persons living in Alaska or Hawaii and requires eligible persons to have been both a United States citizen and eighteen years of age on or before the 8th of November 1994.

# MULTI-STAGE AREA PROBABILITY SAMPLE DESIGN

The 1994 NES is based on a multi-stage area probability sample selected from the Survey Research Center's (SRC) National Sample design. Identification of the 1994 NES sample respondents was conducted using a four stage sampling process—a primary stage sampling of U.S. Metropolitan Statistical Areas (MSAs) and counties, followed by a second stage sampling of area segments, a third stage sampling of housing units within sampled area segments and concluding with the random selection of a single respondent from selected housing units. A detailed documentation of the SRC National Sample is provided in the SRC publication titled 1980 SRC National Sample: Design and Development.

# Primary Stage Selection

The selection of primary stage sampling units (PSUs), which depending on the sample stratum are either MSAs, single counties or groupings of small counties, is based on the county-level 1980 Census Reports of Population and Housing. Primary stage units were assigned to 84 explicit strata based on MSA/Non-MSA status, PSU size, and geographic location. Sixteen of the 84 strata contain only a single self-representing PSU, each of which is included with certainty in the primary stage of sample selection. The remaining 68 nonself-representing strata contain more than one PSU. From each of these nonself-representing strata, one PSU was sampled with probability proportionate to its size (PPS) measured in 1980 occupied housing units.

The full SRC National Sample of 84 primary stage selections was designed to be optimal for surveys roughly two to three times the size of the 1994 NES. To permit the flexibility needed for optimal design of smaller survey samples, the primary stage of the SRC National Sample can be readily partitioned into smaller subsamples of PSUs such as one-half sample or two-thirds sample partition. Each of the partitions represents a stratified subselection from the full 84 PSU design. The one-half partition of the 1980 National Sample (i.e., the "A" primary sampling units or PSUs) includes 11 of the 16 self-representing MSA PSUs and a stratified subsampling of 34 of the 68 nonself-representing PSUs of the SRC National Sample. The two-thirds partition includes all of the "A" PSUs plus "B1" PSUs, i.e., 5 additional self-representing PSUs and 11 additional nonself-representing PSUs.

Since the 1994 NES desired comparison of data over time from 1992 NES respondents, as well as a representative sample of eligible 1994 respondents, the 1994 NES sample design includes both a panel and a cross-section component.

The panel component of the 1994 design consists of all [1] respondents from the cross-section component of the 1992 NES sample. The 1994 cross-section component is a new selection of respondents from an area probability sample of households taken from the two-thirds partition of the SRC National Sample.

[1] The Panel consists of all 1005 Respondents from the 1992 NES study Cross-Section sample. Of these, 925 were recontacted in the 1993 NES Pilot Study (a follow-up of the 1992 NES survey), of which 750 were re-interviewed, 98 refused to be re-interviewed and 77 could not be re-interviewed at that time due to some 'permanent' condition. 80 of the 1005 1992 Cross-section respondents could not be found for re-interview in 1993.

Due to sample design decisions in 1992, when the NES sample moved from using the one-half sample partition to the two-thirds sample partition of the SRC National Sample, the cross-section portion of the 1992 NES sample included a disproportionate number of selections from segments in "B1" PSUs (see Table 2). This same disproportionate distribution is, of course, reflected in the 1994 Panel component of the 1994 NES sample. While this does lead to some statistical inefficiency in the form of increased variance of survey estimates relative to that of an even distribution across the two-thirds partition primary areas, since the "B1" PSU areas do represent a proper subsample of the 1980 National Sample design, separate longitudinal analysis of the Panel component of the 1994 NES may be undertaken as well as analysis of combined Panel and Cross-section data [2].

[2] Analysis of pooled data from respondents from both components of the 1994 NES sample requires a strong assumption about the nature of the attrition of the 1992 cross-section sample. It must be assumed that panel attrition is not correlated with variables under consideration in the analysis.

Table 1 identifies the PSUs for the 1994 National Election Study by MSA status and Region. The "B1" PSUs in the Panel portion of the sample design which received the disproportionate allocation in 1992 to supplement the half-sample are shown in italic print on this table; all PSUs on this table are proportionately represented in the 1994 two-thirds Cross- Section Sample.

Second Stage Selection of Area Segments

The second stage of the 1994 NES National Sample was selected directly from computerized files that were prepared from the 1990 [3] Census file (PL94-171 file on CD Rom) which

contains the block-level 1990 Census total housing unit (HU) data. The designated second-stage sampling units (SSUs), termed "area segments", are comprised of census blocks in the metropolitan (MSA) primary areas and either census blocks or enumeration districts (EDs) in the rural areas of non-MSA primary areas. Each SSU block, block combination or enumeration district for non-MSA PSUs was assigned a measure of size equal to the total 1980 occupied housing unit count for the area; MSA SSU block(s) were assigned a minimum measure of 72 1990 total HUs per SSU. Second stage sampling of area segments was performed with probabilities proportionate to the assigned measures of size (PPS).

[3] Non-MSA segments were selected from the 1980 Census summary tape file series STF1B file, with minimum SSU size of 50 occupied HUs.

A three-step process of ordering the SSUs within the primary areas produced an implicit stratification of the area segments in the second stage sampling frame, stratified at the county level by geographic location and population. Area segments were stratified within county at the Minor Civil Division (MCD) level by size and income, and at the block and ED level by location within the MCD or county. (For details, refer to the SRC publication, 1980 National Sample: Design and Development.)

For the 1994 NES Panel/Cross-section sample the number of area segments used in each PSU varies. In the self-representing (SR) PSUs the number of sample area segments varied in proportion to the size of the primary stage unit, from a high of 12 Cross-section and 7 Panel area segments in the self-representing New York MSA, to a low of 4 Cross-section and no Panel area segments in the smaller self-representing PSUs such as Pittsburgh and Boston MSAs. Most Nonself-representing (NSR) PSUs were represented by 6 Cross-section and 2 Panel area segments except for "B1" PSUs for which there are either 5 or 6 Panel segments. A total of 554 area segments were selected, 191 Panel and 363 Cross-Section segments, 157 in the sixteen self-representing PSUs and 397 in the nonself-representing PSUs as shown in Table 2.

In most cases, both Cross-Section and Panel selections were been made from the same area segments within each PSU, so in actual fact a total of 376 distinct National Sample area segments have been used for the 1994 NES Post-Election Study.

<sup>[4]</sup> The number of segments shown for the 1994 Panel is the expected count; it is based on the number of 1992 Cross-Section segments. It is possible that some of these 1992 segments yielded no 1992 interviews and so do not actually show up in the 1994 Panel. The total number of segments shown for the 1994 Cross-section sample also includes three segments from which no listed HU was selected for the 1994 cross-section, due to few or no HU listings for that segment. Where different, the actual number of segments having selections in 1994 is shown in parentheses to the left.

# Third Stage Selection of Housing Units

For each area segment selected in the second sampling stage, a listing was made of all housing units located within the physical boundaries of the segment. For segments with a very large number of expected housing units, all housing units in a subselected part of the segment were listed. The final equal probability sample of housing units for the 1994 NES was systematically selected from the housing unit listings for the sampled area segments.

The new Cross-Section component of the 1994 NES sample design was selected from the SRC National Sample to yield an equal probability sample of households. The distribution of the 1994 cross-section sample is that required by the two-thirds design of the SRC National Sample. The overall probability of selection for 1994 NES Cross-Section households was f=.00001885 or .1885 in 10,000. The equal probability sample of households was achieved for the Cross-Section design by using the standard multi-stage sampling technique of setting the sampling rate for selecting housing units within area segments to be inversely proportional to the PPS probabilities used to select the PSU and area segment [5].

[5] Kish, L. (1965). Survey Sampling, John Wiley & Sons, New York, NY.

The 1994 Panel consists of all respondents for whom a complete interview was obtained in the 1992 NES Cross-section sample. 1005 1992 cross-section interview HUs make up the 1994 Panel.

## Fourth Stage Respondent Selection

Within each sampled new cross-section housing unit, the SRC interviewer prepared a complete listing of all eligible household members. Using an objective procedure described by Kish (1949) [6] a single respondent was then selected at random to be interviewed. Regardless of circumstances, no substitutions were permitted for the designated respondent. This technique had also been used in 1992 to select the original Panel respondents. In 1994 the same Panel respondent (R) was sought for interview as had been interviewed in 1992.

[6] Kish, L. (1949). "A procedure for objective respondent selection within the household," Journal of the American Statistical Association, Vol 44, pp. 380-387.

# SAMPLE DESIGN SPECIFICATIONS

The targeted completed interview sample size for the 1994 NES Post-Election Survey was n=1,750 total cases. In the original sample size computation, the following assumptions were made for the cross-section component of the sample: response rate for post-election interview = .74, combined occupancy/eligibility rate = .83 and change from updating the sample HU listings = 1.02. The updating was to include

only "Type II" updating, i.e., only changes found at selected lines at the time of interviewing; no pre-study update was felt to be necessary due to the fact that most of the selected segments had been used and updated recently on other SRC studies (Health and Retirement Survey and the Asset and Health Dynamics Survey). The assumption as to occupancy/eligibility rate was derived from survey experience in the 1986 NES Post Election Survey [7] and that regarding response rate was based on the 1992 cross-section component outcome for the pre-election interview [8]. The assumptions made for the panel component were: .915 recontact rate based on the .923 recontact rate in the 1993 NES Pilot Study for 1992 cross-section respondents (i.e., same respondents as the current 1994 Panel), .691 response rate for the post-election interview based on NES experience from 1990-1992 in recontacting respondents three times over a two year period, and at .975 change from the update assuming some loss of HUs among panel respondents and inability to track the respondent to a new address.

- [7] The 1986 NES was the most recent NES sample using the two-thirds National Sample without alteration (e.g., increasing number of segments in the B1 areas as in 1992). Occupancy/eligibility rate was .835.
- [8] The response rate in 1986 had been unusually low, and it was felt that the more recent experience in the two-thirds partition PSUs would be the best estimate--less affected than occupancy/eligibility rate by the increased number of segments in B1 areas.

Table 3 provides a full description of the original sample design specifications. Table 4 shows those specifications and assumptions applied to the actual selected Cross-section component of the 1994 NES Sample and also indicates the number of HU listings assigned to each replicate.

# [9] Based on field experience in 1986 NES study.

To most closely tailor the field effort to the sample field experience during this study, the cross-section sample had four replicates designated (see Table 4). Each replicate is a proper subsample of the NES sample. Replicate 1, considered the "base sample", was to be released for interviewing to begin November 9, 1994, the day following Election Day 1994. The other three replicates of the cross-section sample (Replicates 2-4) were designated "Reserve" replicates, none, one or more to be released for field work no later than November 21, 1994 at the discretion of NES study staff based on daily monitoring of field results from Release 1. Reserve replicates 2-4 of the cross-section component of the NES sample were never, in fact, released for field work.

A subsampling of one-third of selected addresses was made in certain cases when selected lines were determined to be within locked buildings, in gated subdivisions or in areas which posed a danger to interviewing staff. This allowed concentration of greater field effort in these circumstances to obtain at least some interviews. In cases where this was done, appropriate weighting of the results will be used to compensate. (See Table 5.)

# SAMPLE DESIGN OUTCOMES

Table 5 compares the original sample design specifications and assumptions for the new Cross-Section Component of the 1994 NES (as in Table 3) applied to the released cross-section sample (Replicate 1) to the outcome for the final Cross-Section sample. Table 6 makes a similar comparison for the Panel Component of the 1994 NES Sample and Table 7 presents a summary of the figures for the

combined Cross-Section/Panel Sample.

Table 5: Original Sample Design Specifications and Assumptions and Actual Sample Design Outcomes for the Cross-Section Component of the 1994 National Post-Election Survey

|   | Original Specifications & Assumptions Applied to: | Actual | Outcome                           |
|---|---|--------|-----------------------------------|
|   | Actual Release (Replicate 1)                      |        |                                   |
| Completed Interviews<br>Response Rate   | 1,097<br>.74                                      |        | 1,036<br>.721                     |
| Designated Respondents<br>Occupancy/Eligibility R   | 1,482<br>Rate .83                                 |        | 1,436<br>.824<br>1,740            |
| Subsampling for dangerous locked areas Sample HU listings Sample growth from upda Selected Sample lines | <br>1,786   |        | .99[11]<br>1,757<br>1.00<br>1,751 |

- [11] One percent of the released sample was lost due to subsampling in three locked and dangerous segment areas; 17 of the 20 selected lines excluded from these six segments were in replicate 1. These lines were assigned a result code of '75' and considered 'Non-Sample' lines.
- [12] Since only the Type II updating process was applied to the cross-section component of the 1994 NES Sample, the update inflation factor was set at 1.02 -- slightly lower than the usual factor of 1.03 typical of combined Type I (pre-study) and Type II updating inflation applied to the National Sample.

Based on the daily monitoring of field results, on November 21, 1994 NES study staff decided that it would be a better use of study resources to raise the cross-section response rate rather than to release additional cross-section sample which might have had the effect of further reducing the response rate. Therefore no reserve replicates of the cross-section sample were released.

Table 6 /s shows the panel component sample outcome for the 1994 NES Post-Election Survey. Of course, in this component all sample lines were released; no reserve replicates were designated to be withheld. Due to extremely conservative original assumptions, the actual number of interviews obtained exceeded even the most optimistic projection by nearly 60 interviews. This has more than made up for the fewer than anticipated cross-section interviews which can be seen in Table 7, where entire 1994 NES sample design projections are compared with the combined sample outcome.

Table 6: Original Sample Design Specifications and Assumptions and Actual Sample Design Outcomes for the Panel Component of the 1994 National Post-Election Survey

|  | Original Specifications & Assumptions Applied to Rele | Outcome     |
|--|---|-------------|
| Completed Interviews<br>Response Rate          | 620[13]<br>.691[14]                                   | 759<br>.770 |
| HHs with Eligible Resp<br>Panel Recontact Rate | 897<br>.917   | 986<br>.981 |
| Sample Units<br>Change from update             | 980<br>.975   | 1,005       |
| Total Panel Cases                              | 1,005   | 1,005       |

[13] Actually the projection ranged from 620-700 completed interviews. See comments in following footnote.

[14] An overall Panel response rate of 69.1% was assumed, based on previous recontact experience (response rate of 1990 Pilot Study respondents to the 1992 NES Pre-Election Study follow-up): 750 cases were interviewed twice previously at 76.6% response rate = 575 cases, and 255 other cases combined 17.6% response rate = 45 cases. Removing the change from update and recontact rate (1005 - 25 - 83 = 897), overall response rate: 620/897 = .691. This was admittedly a very conservative estimate and actual projection of expected number of interviews was a range of 620-700.

>> WEIGHTED ANALYSIS OF 1994 NES DATA

The area probability sample design for the 1994 NES results in an equal probability sample of U.S. households. However,

within sample households a single adult respondent is chosen at random to be interviewed. Since the number of eligible adults may vary from one household to another, the random selection of a single adult introduces inequality into respondents' selection probabilities. In analysis, a respondent selection weight should be used to compensate for these unequal selection probabilities. The value of the respondent selection weight is exactly equal to the number of eligible adults in the household from which the random respondent was selected. The use of the respondent selection weight is strongly encouraged, despite past evaluations which have shown these weights to have little significant impact on the values of NES estimates of descriptive statistics.

The Sampling Section has provided two final person-level analysis weights which incorporate sampling, nonresponse and post-stratification factors. One weight variable (#5) is for use with Panel cases only; the other weight variable (#4) is for the 1994 NES Cross-section (which includes both panel and new cross-section cases.) In addition, a Time Series Weight (variable #6) which corrects for panel attrition was constructed. This weight should be used in analyses which compare the 1994 NES to earlier unweighted National Election Study data collections. Analysts interested in developing their own nonresponse or post-stratification adjustment factors must request access to the necessary sample control data from the NES Board.

# CONSTRUCTION OF ANALYSIS WEIGHTS

Nonresponse adjustment factors were constructed at the household level separately for Panel and new Cross-Section component cases. Nonresponse adjustment cells were formed by crossing PSU type (Self-representing, Nonself-representing MSA or non-MSA) by the nine Census divisions (New England, Middle Atlantic, East North Central, West North Central, South Atlantic, East South Central, West South Central, Mountain, and Pacific). A nonresponse factor equal to the inverse of the response rate in each cell was applied to the interview cases. In order to have a minimum of approximately 25 cases in each nonresponse adjustment cell, some cells were collapsed across Census Divisions in the same Census Region. Tables 8 and 9 show the nonresponse adjustment factors for the Panel and for new cross section respectively.

An intermediate weight was constructed by multiplying the reciprocal of the probability of selection of the household by the nonresponse adjustment factor and by the number of eligible persons in the household [15]. This intermediate weight was used to produce a weighted sex by age category by Census Region table. The age categories used were: 18-44, 45-64, and 65+. Post- stratification factors were constructed to match the sample proportions in the 24 sex by age by Region cells to the July 1993 Census population projections (Current Population Reports, P25- 1111, Table 4). Table 10 shows the post-stratification factors for the 1994 NES Panel. Table 11 shows the post-stratification factors for the complete cross-section (both panel and new

cross section cases.) The two final analysis weights were each centered to a mean of 1.0 so that the sum of the weights equals the number of respondents.

[15] In constructing the analysis weight, a maximum of three eligible adults was allowed

# CONSTRUCTION OF TIME SERIES WEIGHT

The 1994 NES Panel consists of 759 respondents originally selected for the 1992 Pre-Election Study. Of 1,126 1992 Pre-Election respondents, 1,005 were also respondents on the 1992 Post-Election Study. All 1,005 1992 Post-Election respondents were eligible for the 1994 NES Panel. In order to adjust for panel attrition, a Time Series Weight was constructed which adjusts the proportions for 30 demographic cells: Education (3) by Age Group (5) by Years of Residence (2) to the 1992 proportions. New 1994 cross-section cases have a Time Series weight of 1.0. In forming the panel attrition weight cells, the following definitions were used:

Age Group: 17-24, 25-39, 40-64, 65-74, 75 or more. Education: Less than high school graduate, high school graduate, more than high school education. Years of Residence: Less than 3 years at current residence, 3 or more years at current residence.

#### >> 1994 PROCEDURES FOR SAMPLING ERROR ESTIMATION

The 1994 NES is based on a stratified multi-stage area probability sample of United States households. Although smaller in scale, the NES sample design is very similar in it basic structure to the multi-stage designs used for major federal survey programs such as the Health Interview Survey (HIS) or the Current Population Survey (CPS). The survey literature refers to the NES, HIS and CPS samples as complex designs, a loosely-used term meant to denote the fact that the sample incorporates special design features such as stratification, clustering and differential selection probabilities (i.e., weighting) that analysts must consider in computing sampling errors for sample estimates of descriptive statistics and model parameters. This section of the 1994 NES sample design description focuses on sampling error estimation and construction of confidence intervals for survey estimates of descriptive statistics such as means, proportions, ratios, and coefficients for linear and logistic linear regression models.

Standard analysis software systems such SAS, SPSS, OSIRIS assume simple random sampling (SRS) or equivalently independence of observations in computing standard errors for sample estimates. In general, the SRS assumption results in underestimation of variances of survey estimates of descriptive statistics and model parameters. Confidence intervals based on computed variances that assume independence of observations will be biased (generally too narrow) and design-based inferences will be affected accordingly.

Sampling Error Computation Methods and Programs

Over the past 50 years, advances in survey sampling theory have guided the development of a number of methods for correctly estimating variances from complex sample data sets. A number of sampling error programs which implement these complex sample variance estimation methods are available to NES data analysts. The two most common approaches to the estimation of sampling error for complex sample data are through the use of a Taylor Series Linearization of the estimator (and corresponding approximation to its variance) or through the use of resampling variance estimation procedures such as Balanced Repeated Replication (BRR) or Jackknife Repeated

Replication(JRR). New Bootstrap methods for variance estimation can also be included among the resampling approaches. See Rao and Wu (1988).

# 1. Linearization Approach

If data are collected using a complex sample design with unequal size clusters, most statistics of interest will not be simple linear functions of the observed data. The objective of the linearization approach is to apply Taylor's method to derive an approximate form of the estimator that is linear in statistics for which variances and covariances can be directly estimated. Kish, 1965; Woodruff, 1971). Linearized variance approximations are derived for estimators of ratio means (Kish and Hess, 1959); finite population regression coefficients and correlation coefficients (Kish and Frankel, 1974); and many other non-linear statistics. Software packages such as SUDAAN and PC CARP (see below) use the Taylor Series linearization method to estimate standard errors for the coefficients of logistic regression models. In these programs, an iteratively reweighted least squares algorithm is used to compute maximum likelihood estimates of model parameters. At each step of the model fitting algorithm, a Taylor Series linearization approach is used to compute the variance/covariance matrix for the current iteration's parameter estimates (Binder, 1983).

Available sampling error computation software that utilizes the Taylor Series linearization method includes: SUDAAN and PC SUDAAN, SUPERCARP AND PC CARP, CLUSTERS, OSIRIS PSALMS, OSIRIS PSRATIO, and OSIRIS PSTABLES. PC SUDAAN and PC CARP include procedures for estimation of sampling error both for descriptive statistics such as means, proportion, totals and for parameters of commonly used multivariate models (least squares regression, logistic regression).

# 2. Resampling Approaches

In the mid-1940's, P.C. Mahalanobis (1946) outlined a simple replicated procedure for selecting probability samples that permits simple, unbiased estimation of variances. The practical difficulty with the simple replicated approach to design and variance estimation is that many replicates are needed to achieve stability of the variance estimator. Unfortunately, a design with many independent replicates must utilize a coarser stratification than alternative designs—to achieve stable variance estimates, sample precision must be sacrificed. Balanced Repeated Replication (BRR), Jackknife Repeated Replication (JRR) and the Bootstrap are alternative replication techniques that may be used for estimating sampling errors for statistics based on complex sample data.

The BRR method is applicable to stratified designs in which two half-sample units (i.e., PSUs) are selected from each design stratum. The conventional "two PSU-per-stratum" design in the best theoretical example of such a design although in practice, collapsing of strata (Kalton, 1977) and random combination of units within strata are employed

to restructure a sample design for BRR variance estimation. The half-sample codes prepared for the 1994 NES data set require the collapsing of nonself-representing strata and the randomized combination of selection units within self-representing (SR) strata. When full balancing of the half-sample assignments is employed (Wolter, 1985), BRR is the most computationally efficient of the replicated variance estimation techniques. The number of general purpose BRR sampling error estimation programs in the public domain is limited. The OSIRIS REPERR program includes the option for BRR estimation of sampling errors for least squares regression coefficients and correlation statistics. Research organizations such as Westat, Inc. and the National Center for Health Statistics have developed general purpose programs for BRR estimation of standard errors. Another option is to use SAS or SPSS Macro facilities to implement the relatively simple BRR algorithm. The necessary computation formulas and Hadamard matrices to define the half-sample replicates are available in Wolter (1985).

With improvements in computational flexibility and speed, jackknife (JRR) and bootstrap methods for sampling error estimation and inference have become more common (Rao and Wu, 1988). Few general purpose programs for jackknife estimation of variances are available to analysts. OSIRIS REPERR has a JRR module for estimation of standard errors for regression and correlation statistics. Other stand alone programs may also be available in the general survey research community. Like BRR, the algorithm for JRR is relatively easy to program using SAS, SPSS or S-Plus macro facilities.

BRR and JRR are variance estimation techniques, each designed to minimize the number of "resamplings" needed to compute the variance estimate. In theory, the bootstrap is not simply a tool for variance estimation but an approach to actual inference for statistics. In practice, the bootstrap is implemented by resampling (with replacement) from the observed sample units. To ensure that the full complexity of the design is reflected , the selection of each bootstrap reflects the full complexity of the stratification, clustering and weighting that is present in the original sample design. A large number of bootstrap samples are selected and the statistic of interest is computed for each. The empirical distribution of the estimate that results from the large set of bootstrap samples can then be used to a variance estimate and a support interval for inference about the population statistic of interest.

In most practical survey analysis problems, the JRR and Bootstrap methods should yield similar results. Most survey analysts should choose JRR due to its computational efficiency. NES data analysts interested in the bootstrap technique are referred to LePage and Billard (1992) for additional reading and a bibliography for the general literature on this topic.

One aspect of BRR, JRR and bootstrap variance estimation that is often pushed aside in practice is the treatment of

analysis weights. In theory, when a resampling occurs (i.e., a BRR half sample is formed), the analysis weights should be recomputed based only on the selection probabilities, nonresponse characteristics and post-stratification outcomes for the units included in the resample. This is the correct way of performing resampling variance estimation; however, in practice acceptable estimates can be obtained through use of the weights as they are provided on the public use data set.

# Sampling Error Computation Models

Regardless of whether linearization or a resampling approach is used, estimation of variances for complex sample survey estimates requires the specification of a sampling error computation model. NES data analysts who are interested in performing sampling error computations should be aware that the estimation programs identified in the preceding section assume a specific sampling error computation model and will require special sampling error codes. Individual records in the analysis data set must be assigned sampling error codes which identify to the programs the complex structure of the sample (stratification, clustering) and are compatible with the computation algorithms of the various programs. To facilitate the computation of sampling error for statistics based on 1994 NES data, design-specific sampling error codes will be routinely included in all public-use versions of the data set. Although minor recoding may be required to conform to the input requirements of the individual programs, the sampling error codes that are provided should enable analysts to conduct either Taylor Series or Replicated estimation of sampling errors for survey statistics.

Table 13 defines the sampling error coding system for 1994 NES sample cases. Two sampling error code variables are defined for each case based on the sample design primary stage unit (PSU) and area segment in which the sample household is located.

Sampling Error Stratum Code (Variable #63). The Sampling Error Computation Stratum Code is the variable which defines the sampling error computation strata for all sampling error analysis of the NES data. With the exception of the New York, Los Angeles and Chicago MSAs, each self-representing (SR) design stratum is represented by one sampling error computation stratum. Due to their population size, two sampling error computation strata are defined for each of the three largest MSAs. Pairs of similar nonself-representing (NSR) primary stage design strata are "collapsed" (Kalton, 1977) to create NSR sampling error computation strata.

The SRC National Sample design uses Controlled selection and a "one-per-stratum" PSU allocation are used to select the primary stage of the 1994 NES national sample. The purpose in using Controlled Selection and the "one-per-stratum" sample allocation is to reduce the between-PSU component of sampling variation relative to a "two-per-stratum" primary stage design. Despite the expected improvement in sample

precision, a drawback of the "one-per- stratum" design is that two or more sample selection strata must be collapsed or combined to form a sampling error computation stratum. Variances are then estimated under the assumption that a multiple PSU per stratum design was actually used for primary stage selection. The expected consequence of collapsing design strata into sampling error computation strata is the overestimation of the true sampling error; that is, the sampling error computation model defined by the codes contained in Table 13 will yield estimates of sampling errors which in expectation will be slightly greater than the true sampling error of the statistic of interest.

SECU - Stratum-specific Sampling Error Computation Unit code (Variable #64) is a half sample code for analysis of sampling error using the BRR method or approximate "two-per-stratum" Taylor Series method (Kish and Hess,1959). Within the SR sampling error strata, the SECU half sample units are created by dividing sample cases into random halves, SECU=1 and SECU=2. The assignment of cases to half-samples is designed to preserve the stratification and second stage clustering properties of the sample within an SR stratum. Sample cases are assigned to SECU half samples based on the area segment in which they were selected. For this assignment, sample cases were placed in original stratification order (area segment number order) and beginning with a random start entire area segment clusters were systematically assigned to either SECU=1 or SECU=2.

In the general case of nonself-representing (NSR) strata, the half sample units are defined according to the PSU to which the respondent was assigned at sample selection. That is, the half samples for each NSR sampling error computation stratum bear a one-to-one correspondence to the sample design NSR PSUs.

The particular sample coding provided on the NES public use data set is consistent with the "ultimate cluster" approach to complex sample variance estimation (Kish, 1965; Kalton, 1977). Individual stratum, PSU and segment code variables may be needed by NES analysts interested in components of variance analysis or estimation of hierarchical models in which PSU-level and neighborhood-level effects are explicitly estimated.

Table 13 shows the sampling error stratum and SECU codes to be used for the paired selection model for sampling error computations for any 1994 NES analyses; the same codes can be used when using the combined cross-section/panel data or when using either panel or cross- section data separately. The 42 strata reflect the two-thirds National Sample design used in 1994.

It can be seen from this table that the three-digit 1994 SE code is comprised of: first the two-digit SE Stratum code followed by the one-digit SECU code.

Table 13. 1994 National Election Study Sampling Error Codes

| Sampling Erro<br>Stratum Code | r SECU Code<br>(Half Sample) |            | Segment<br>Numbers<br>Cross-<br>Section | Segment<br>Numbers<br>Panel |

Generalized Sampling Error Results for the 1994 NES

To assist NES analysts, the OSIRIS PSALMS program was used to compute sampling errors for a wide-ranging example set of means and proportions estimated from the 1988 NES Pre-election Survey data set [16]. For each estimate, sampling

errors were computed for the total sample and for twenty demographic and political affiliation subclasses of the 1988 NES Pre-Election Survey sample. The results of these sampling error computations were then summarized and translated into the general usage sampling error table provided in Table 14.

[16] The design effects from the 1988 NES are expected to be similar to those for the 1994 NES. Sampling errors for the 1994 NES have not been run.

Incorporating the pattern of "design effects" observed in the extensive set of example computations, Table 14 provides approximate standard errors for percentage estimates based on the 1988 NES. To use the table, examine the column heading to find the percentage value which best approximates the value of the estimated percentage that is of interest [17].

Next, locate the approximate sample size base (denominator for the proportion) in the left-hand row margin of the table. To find the approximate standard error of a percentage estimate, simply cross-reference the appropriate column (percentage) and row (sample size base). Note: the tabulated values represent approximately one standard error for the percentage estimate. To construct an approximate confidence interval, the analyst should apply the appropriate critical point from the "z" distribution (e.g., z=1.96 for a two-sided 95% confidence interval half-width). Furthermore, the approximate standard errors in the table apply only to single point estimates of percentages not to the difference between two percentage estimates.

[17] The standard error of a percentage is a systematic function with its maximum centered at=50%; i.e., the standard error pf p=40% and p=60% estimates are equal.

The generalized variance results presented in Table 14 are a useful tool for initial, cursory examination of the NES survey results. For more in depth analysis and reporting of critical estimates, analysts are encouraged to compute exact estimates of standard errors using the appropriate choice of a sampling error program and computation model.

>> SAMPLE DESIGN OF THE 1992 PRE- AND POST-ELECTION STUDY

# STUDY POPULATION

The study population for the 1992 National Pre/Post Election Study (NES) is defined to include all United States citizens of voting age on or before the 1992 Election Day. Eligible citizens must have resided in housing units, other than on military reservations, in the forty-eight coterminous states. This definition excludes persons living in Alaska or Hawaii and requires eligible persons to have been both a United States citizen and eighteen years of age on or before the 3rd of November 1992.

### MULTI-STAGE AREA PROBABILITY SAMPLE DESIGN

The 1992 NES is based on a multi-stage area probability sample selected from the Survey Research Center's (SRC) National Sample design. Identification of the 1992 NES sample respondents was conducted using a four stage sampling process—a primary stage sampling of U.S. Metropolitan Statistical Areas (MSAs) and counties, followed by a second stage sampling of area segments, a third stage sampling of housing units within sampled area segments and concluding with the random selection of a single respondent from selected housing units. A detailed documentation of the SRC National Sample is provided in the SRC publication titled, 1980 SRC National Sample: Design and Development.

### Primary Stage Selection

The selection of primary stage sampling units (PSUs), which depending on the sample stratum are either MSAs, single counties or groupings of small counties, is based on the county-level 1980 Census Reports of Population and Housing. Primary stage units were assigned to 84 explicit strata based on MSA/Non-MSA status, PSU size, and geographic location. Sixteen of the 84 strata contain only a single self-representing PSU, each of which is included with certainty in the primary stage of sample selection. The remaining 68 nonself-representing strata contain more than one PSU. From each of these nonself-representing strata,

one PSU was sampled with probability proportionate to its size (PPS) measured in 1980 occupied housing units.

The full SRC National Sample of 84 primary stage selections was designed to be optimal for surveys roughly two to three times the size of the 1992 NES. To permit the flexibility needed for optimal design of smaller survey samples, the primary stage of the SRC National Sample can be readily partitioned into smaller subsamples of PSUs. Each of the partitions represents a stratified subselection from the full 84 PSU design.

Since the 1992 NES desired comparison of data over time from 1990 NES respondents, as well as an expanded representative sample of eligible 1992 respondents, a combined panel/cross-section sample was designed for the 1992 Pre/Post-Election Study.

The Panel portion of the 1992 sample was selected from the original 1990 NES sample which, at the Primary stage had been selected from the "one-half" partition of the 1980 SRC National Sample. The "A" one-half sample of the 1980 National Sample design includes 11 of the 16 self-representing MSA PSUs and a stratified subsampling of 34 (of the 68) nonself-representing PSUs of the SRC National Sample. The Panel portion of the 1992 NES is designed to allow longitudinal analysis of individual change since the panel cases follow the original proportionate distribution to the 1990 "A" one-half sample areas.

The 1992 NES Cross-Section encompasses both the panel cases and a new selection of cases from the two-thirds partition of the 1980 National Sample (that is the "A" plus the "B1" PSUs). The two-thirds 1980 National Sample design includes all 16 self-representing PSUs and 11 additional nonself-representing PSUs for a total of 45 (of 68) nonself-representing PSUs. The additional cases were added to the 1992 NES to supplement the Panel selections such that when the Panel and new Cross-section selections are combined for analysis a representative cross-section of the study population has been maintained.

Table 9 identifies the PSUs for the 1992 National Election Study by MSA status and Region. The PSUs in the Panel portion of the sample design are shown in standard print on this table while those PSUs added for the two-thirds Cross-section are shown in italics.

NOTE: The PSU's marked with an asterisk are Self-Representing for sample designs which use the two-thirds or larger portion of the sample (i.e., in this case, the combined cross-section and panel design). For the half-sample design (i.e., in this case, the panel portion alone) only 6 of the 16 Self-Representing areas remain Self-Representing. The other ten Self-Representing PSU's are paired and only five are used in the half-sample design, each representing both itself and the PSU it is paired with.

Second Stage Selection of Area Segments

The second stage of the 1980 National Sample was selected directly from computerized files that were prepared from the 1980[8] Census summary tape file series (STF1-B). The designated second-stage sampling units (SSUs), termed "area segments", are comprised of census blocks in the metropolitan primary areas and enumeration districts (EDs) in the rural areas of both non-MSA and MSA primary areas. Each SSU block, block combination or enumeration district was assigned a measure of size equal to the total 1980 occupied housing unit count for the area (minimum = 50). Second stage sampling of area segments was performed with probabilities proportionate to the assigned measures of size.

A three-step process of ordering the SSUs within the primary areas produced an implicit stratification of the area segments in the second stage sampling frame, stratified at the county level by geographic location and population. Area segments were stratified within county at the Minor Civil Division (MCD) level by size and income, and at the block and ED level by location within the MCD or county. (For details, refer to the SRC publication, 1980 NATIONAL SAMPLE: DESIGN AND DEVELOPMENT.)

Systematic PPS sampling was used to select the area segments from the second stage sampling frame for each county. In the self-representing (SR) PSUs the number of sample area segments varied in proportion to the size of the primary stage unit, from a high of 12 Cross-section and 12 Panel area segments in the SR New York MSA, 6 Cross-section segments and 5 Panel segments in the San Francisco MSA, to a low of 4 Cross-section and no Panel area segments in the smaller SR PSUs such as Minneapolis and Atlanta MSAs. Most

Nonself-representing (NSR) half-sample (A) PSUs were represented by 2 Cross-section and 6 Panel area segments; most of the eleven other (B1) NSR PSUs had 6 Cross-section area segments (and, of course, no Panel segments). A total of 487 area segments were selected, 206 Cross-section and 281 Panel segments, 151 in the sixteen self-representing PSUs and 336 in the nonself-representing PSUs as shown in Table 10.

<sup>\*\*</sup> In two Non-SMSA National Sample strata (68 and 77) the 1980 materials from which the Panel area segments had been selected was exhausted (i.e., there were insufficient remaining SSUs from which to select new Cross-section area segments), so a new Primary selection had to be made from those two strata. Therefore, the Panel area segments for stratum 68 are from PSU Phillips County, KS, and the

Cross-section area segments are from Saline County, NE; the Panel area segments for stratum 77 are from PSU Monroe County, AR, and the Cross-section area segments are from Ashley County, AR.

Although 281 segments were used in the 1990 NES, only 272 Panel segments appear in the 1992 NES Panel. The difference is due to some segments used in 1990 not having any interviews completed in 1990 and, therefore, not becoming part of the 1992 Panel.

Third Stage Selection of Housing Units

For each area segment selected in the second sampling stage, a listing was made of all housing units located within the physical boundaries of the segment. For segments with a very large number of expected housing units, all housing units in a subselected part of the segment were listed. The final equal probability sample of housing units for the 1992 NES was systematically selected from the housing unit listings for the sampled area segments.

The overall probability of selection for 1992 NES Cross-Section households was f=.00003988 or .3988 in 10,000. The equal probability sample of households was achieved for the combined Cross-Section/Panel design by using the standard multi-stage sampling technique of setting the sampling rate for selecting housing units within area segments to be inversely proportional to the PPS probabilities (see above) used to select the PSU and area segment.

Five 1992 Panel replicates were designated for the entire "frame" of households in which a complete interview was obtained in the 1990 NES study (2000 - 11 partial interviews = 1989 1990 interview HUs). The original 1990 sample lines had been selected from the National Sample ("A" or "half-sample" PSUs) to be inversely proportional to the PPS probabilities used to select the area segments as described in the previous paragraph.

The new Cross-Section component of the 1992 NES sample design was disproportionately allocated to the "B1" PSUs to supplement the Panel cases such that when cross-sectional analysis was undertaken, combining new cross-section cases with panel cases would yield an equal probability sample of households. The distribution of the combined sample would be that required by the two-thirds design.

# Fourth Stage Respondent Selection

Within each sampled new cross-section housing unit, the SRC interviewer prepared a complete listing of all eligible household members. Using an objective procedure described by Kish (1949)[9] a single respondent was then selected at random to be interviewed. Regardless of circumstances, no substitutions were permitted for the designated respondent. This technique had also been used in 1990 to select the original Panel respondents. In 1992 the same Panel respondent (R) was sought for interview as had been

interviewed in 1990.

### SAMPLE DESIGN SPECIFICATIONS

The targeted completed interview sample size for the 1992 NES Pre/Post-Election Survey was n = 2,057 total cases. In the original sample size computation, the following assumptions were made for the cross-section component of the sample: response rate for the pre-election interview = .72 and of these 95% were assumed to be available and cooperative for the post-election interview, combined occupancy/eligibility rate = .83. These assumptions were derived from survey experience in the 1986 NES Post Election Survey[10]. The assumptions made for the panel component were: .913 recontact rate and .75 response rate for the pre-election interview. The same .95 response rate for the post-election interview was assumed for both the panel and the cross-section component.

To most closely tailor the field effort to the sample field experience during this study, both parts of the selected sample had five replicates designated. Replicates 1 and 2 were considered the "base sample", certain to be released. 55% of this base was designated as Replicate 1 to be released September 1, 1992 and 45% designated as Replicate 2 to be released October 1, 1992. The other three replicates were designated "Reserve" replicates, one or more to be released for field work October 1, 1992 at the discretion of NES study staff. Replicate 3 (Reserve replicate 1) was never, in fact, released. Replicates 4 and 5 (Reserve replicates 2 and 3) were released with Base sample replicate 2 on October 1, 1992. Each replicate is a proper subsample of the NES sample.

A subsampling of one-third of selected addresses was made in certain cases when selected lines were determined to be within locked buildings, in gated subdivisions or in areas which posed a danger to interviewing staff. This allowed concentration of greater field effort in these circumstances to obtain at least some interviews. In cases where this was done, appropriate weighting of the results will be used to compensate. (This is not reflected in the following tables however).

Table 11 provides a full description of the original sample design specifications applied to the Base Sample and also indicates the number of HU listings assigned to each replicate. As stated above, Replicates 1 and 2 constitute the Base Sample; Replicates 3, 4 and 5 are reserve replicates. Replicate 3 was, in fact, never released for field work.

# SAMPLE DESIGN OUTCOMES

Table 12 compares the original sample design specifications and assumptions for the new Cross-Section Component of the 1992 NES as applied to the Base Sample (as in Table 11) and as applied to the actually released sample (Replicates 1, 2, 4 and 5) to the actual outcome for that component. Table 13 makes a similar comparison for the Panel Component of the 1992 NES Sample and Table 14 presents a summary of the figures for the combined Cross-Section/Panel Sample. The response rates which appear in these tables are calculated using both complete and partial (short-form) interviews. An alternative response rate which excludes short-form interviews is described in "Response Rates", above.

Table 12: Original Sample Design Specifications and Assumptions and Actual Sample Design Outcomes for the Cross-Section Component of the 1992 National Pre/Post-Election Survey

|  | Original Specifications & Assumptions (Reps. 1 & 2) |  |

| Total Sample HU listings  | 3,385[21]         | 3,724          |
| Growth from update of<br>Cross-Section compone<br>Selected Sample lines | ent               | 1.015<br>3,667 |
|   | Actual<br>Outcome |                |
| Completed Post/ Interview   | ws 2,255          |                |
| Released for Recontact<br>Completed Pre/ Interview                      | 2,487<br>s 2,487  |                |
| Eligible Sample Househole   | ds 3,274          |                |
| Total Sample HU listings  | 3,712             |                |

In comparing the second column of Table 12 with the third column, it can be seen that, for the 1992 Cross-Section component, the sample growth from the update procedure was slightly less than expected; this was perhaps due to the fact that many of the new cross-section segments had been listed within the year previous to field dates for the 1992 NES study. The original sample design specifications also overestimated the actual occupancy/eligibility rates resulting in 91 fewer eligible HUs than estimated. However, since the actual response rate was higher than estimated,

completed pre-election interviews fell only 35 short of the number estimated. The assumptions for response rate and occupancy/eligibility rate were based on the 1986 NES field experience for a probability sample based on the entire two-thirds design of the National Sample.

The actual response rate for the 1992 cross-section component (.74), as well as the occupancy/eligibility rate very likely reflects the disproportionate allocation of the new cross-section segments in the B1 areas of the National Sample which may well have different occupancy/eligibility and response rates than any overall past NES rates on which the original assumptions were based.

The number of Post-election interviews obtained, 1,005, was closer to the target of 1000 interviews projected for the Base Sample alone than the 1,103 projected for the actual 1,886 sample lines released.

For the Panel Component (see Table 13), both the Panel recontact rate and the response rate exceeded assumptions resulting in 142 more pre-election interviews than expected. A lower than assumed response rate for the post-election interview reduced the excess to 92 more post-election interviews than projected for the release of the Panel base sample plus replicates 4 and 5 (reserve replicates 2 and 3).

The figures for the combined cross-section sample shown in Table 14 show completed pre-election interviews of 107 over expected. Due to lower than assumed response rate for the post-election interview, combined with lower cross-section and higher panel overall response and occupancy/eligibility rates, the final total number of post election interviews was 6 fewer than the projected outcome for the sample lines released.

# >> WEIGHTED ANALYSIS OF 1992 NES DATA

The area probability sample design for the 1992 NES results in an equal probability sample of U.S. households. However, within sample households a single adult respondent is chosen at random to be interviewed. Since the number of eligible adults may vary from one household to another, the random selection of a single adult introduces inequality into respondents' selection probabilities. In analysis, a respondent selection weight should be used to compensate for these unequal selection probabilities. The value of the respondent selection weight is exactly equal to the number of eligible adults in the household from which the random respondent was selected. The use of the respondent selection weight is strongly encouraged, despite past evaluations which have shown these weights to have little significant impact on the values of NES estimates of descriptive statistics.

The Sampling Section has provided two final person level analysis weights which will incorporate sampling, nonresponse and post-stratification factors. One weight

variable (#3009) is for use with Panel cases only; the other weight variable (#3008) is for the 1992 NES Cross-section (which includes both panel and new cross-section cases.) Analysts interested in developing their own nonresponse or post-stratification adjustment factors must request access to the necessary sample control data from the NES Board.

# CONSTRUCTION OF ANALYSIS WEIGHTS

Nonresponse adjustment factors were constructed at the household level separately for Panel and new Cross-Section component cases. Nonresponse adjustment cells were formed by crossing PSU type (Self-representing, Nonself-representing MSA or non-MSA) by the nine Census divisions (New England, Middle Atlantic, East North Central, West North Central, South Atlantic, East South Central, West South Central, Mountain, and Pacific). A nonresponse factor equal to the inverse of the response rate in each cell was applied to the interview cases. In order to have a minimum of approximately 25 cases in each nonresponse adjustment cell, some cells were collapsed across Census divisions in the same Census region.

An intermediate weight was constructed by multiplying the probability of selection of the household by the nonresponse adjustment factor by the number of eligible persons in the household[22]. This intermediate weight was used to produce a weighted sex by age category by Census Region table. The age categories used were: 18-44, 45-64, and 65+. Post-stratification factors were constructed to match the sample proportions in the 24 sex by age by Region cells to the July 1991 Census population totals (United States Department of Commerce News Public Information Office Press Release - CB92-93).

The two final analysis weights were each centered to a mean of 1.0 so that the sum of the weights equals the number of respondents (1,359 for the 1990-92 Panel and 2,485 for the 1992 Cross-section).

# >> COMPARING THE 1992 NES TO PREVIOUS NATIONAL ELECTION STUDIES

Earlier National Election Studies data collections did not include weights to adjust for nonresponse and the unequal probability of selection at the household level. Thus, weighting the 1992 NES data by V3009 (for analysis of the Panel cases) or by V3008 (for combined analysis of the panel and new cross-section cases) produces estimates that are not strictly comparable to those obtained from previous National Election Studies that were not weighted to incorporate sampling, nonresponses and post-stratification factors.

Analysis comparing data from the 1992 NES data to previous NES data collections should employ V7000.

Because approximately half of the respondents to the 1992 NES were part of a panel first interviewed in 1990, to be comparable with previous NES cross-section data collections,

the combined 1992 panel and new cross-section data must be weighted to correct for panel attrition and the aging of the panel respondents. Panel attrition is not uniform across demographic groups. Some respondents (the mobile and those with the least amount of formal education) are more susceptible to panel attrition. By definition, panel respondents are two years older than the cross-section respondents. And by definition, there are almost no 18 or 19 year-olds among the panel respondents interviewed in 1992 (because an 18 year-old in 1992 would have been 16 years-old in 1990 and ineligible for the 1990 study). Weighting of the panel respondents is necessary to ensure comparability with past NES data collections.

V7000 corrects the combined panel and cross-section cases for the panel attrition and aging that occurred among the panel respondents. This weight should be used when comparing estimates made on the 1992 NES data to estimates made on previous (unweighted) NES data collections. V7000 does not appear in the April 1993 CPS Early Release Version of the 1992 National Election Study.

## CONSTRUCTION OF V7000

To construct this weight, panel respondents were classified by age (17-24, 25-39, 40-64, 65-74, 75 and over), education (less than high school, high school diploma, and more than high school education), and mobility (whether or not the respondent had moved between 1990 and 1992). Cross-classification of these three variables produced a 30-celled table (5 x 3 x 2) for each of the following: (1)1990 panel respondents who comprised the panel portion of the sample "universe" for the 1992 study (N=1769); and (2) panel respondents interviewed in 1992 (N=1359). The weight was constructed by dividing the value of each cell in the 1990 table (1) by the value of the corresponding cell in the 1992 table (2). (For example, 10.9 percent of the 1,769 1990 panel respondents were age 40-64/had more than high school education/ had not moved. In 1992, respondents in the cell defined by these same categories comprised 11.8 percent of the 1359 panel respondents interviewed. The case weight for this group of respondents is 10.9/11.8 = .9237.) In order to have a minimum of approximately 25 cases in each cell, some cells were collapsed.

This procedure centers the weight variable V7000 so that it has a mean of 1.0 and the sum of the weights (2488) is approximately equal to the actual number of combined panel and cross-section respondents (2,485). Respondents who are part of the new cross-section have the value "1.0000" on V7000.

>> SAMPLING ERRORS OF 1992 NES ESTIMATES

SAMPLING ERROR CALCULATION PROGRAMS

The probability sample design for the 1992 National Election

Study permits the calculation of estimates of sampling error for survey statistics. For calculating sampling errors of statistics from complex sample surveys, the OSIRIS statistical analysis and data management software system offers the PSALMS and REPERR programs. PSALMS is a general purpose sampling error program which incorporates the Taylor Series approximation approach to the estimation of variances of ratios (including means, scale variables, indices, proportions) and their differences. REPERR is an OSIRIS program which incorporates algorithms for replicated approaches to variance estimation. Both Balanced Repeated Replication (BRR) and Jackknife Repeated Replication (JRR) are available as program options. The current version of REPERR is best suited for estimating sampling errors and design effects for regression and correlation statistics.

Sampling Error Codes and Calculation Model

Estimation of variances for complex sample survey estimates requires a computation model. Individual data records must be assigned sampling error codes which reflect the complex structure of the sample and are compatible with the computation algorithms of the various programs. The sampling error codes for the 1992 NES are included as variables #3068 and #3069 in the ICPSR Public Use data set. The assigned sampling error codes are designed to facilitate sampling error computation according to a paired selection model for both Taylor Series approximation and Replication method programs.

For the Panel Component segments, two sampling error (SE) codes have been included for analysis of 1992 data. For longitudinal analysis of Panel data alone, the original 1990 SE code should be used since this reflects the half-sample design of the 1990 NES sample. For any cross-sectional analysis, where Panel data is combined with new cross-section data, the 1992 SE code must be used. Table 15 provides a description of how individual sampling error code values for Panel only data are to be paired for sampling error computations. Thirty (30) pairs or strata of sampling error computation units (SECUs) are defined. Each SECU in a stratum pair includes cases assigned to a single sampling error code value. The exceptions are the second SECU in stratum 27 which is comprised of cases assigned sampling code values 36 AND 55 and the second SECU in stratum 29 which is comprised of cases with SECUs 61 AND 63.

| 41 | 1 | 2<br>2<br>2<br>2<br>2<br>2<br>2<br>2<br>2<br>2<br>2<br>2<br>2<br>2<br>2<br>2<br>2<br>2<br>2 |
| 42 | 1 | 2   |
|    |   |   |

It can be seen from this table that the three-digit 1992 SE code is comprised of: first the two-digit SE Stratum code followed by the one-digit SECU code.

Generalized Sampling Error Results for the 1992 NES

To assist NES analysts, the OSIRIS PSALMS program was used to compute sampling errors for a wide-ranging example set of means and proportions estimated from the 1988 NES Pre-election Survey data set[24]. For each estimate, sampling errors were computed for the total sample and for fifteen demographic and political affiliation subclasses of the 1988 NES Pre-Election Survey sample. The results of these sampling error computations were then summarized and translated into the general usage sampling error table provided in Table 17.

Incorporating the pattern of "design effects" observed in the extensive set of example computations, Table 17 provides approximate standard errors for percentage estimates based on the 1988 NES. To use the table, examine the column heading to find the percentage value which best approximates the value of the estimated percentage that is of interest[25]. Next, locate the approximate sample size base (denominator for the proportion) in the left-hand row margin of the table. To find the approximate standard error of a percentage estimate, simply cross-reference the appropriate column (percentage) and row (sample size base). Note: the tabulated values represent approximately one standard error for the percentage estimate. To construct an approximate confidence interval, the analyst should apply the appropriate critical point from the "z" distribution (e.g. z=1.96 for a two-sided 95% confidence interval half-width). Furthermore, the approximate standard errors in the table apply only to single point estimates of percentages not to the difference between two percentage estimates.

The generalized variance results presented in Table 17 are a useful tool for initial, cursory examination of the NES survey results. For more in depth analysis and reporting of critical estimates, analysts are encouraged to compute exact estimates of standard errors using the appropriate choice of a sampling error program and computation model.

Table 17: Generalized Variance Table.
1992 NES Pre-Election Survey.

## APPROXIMATE STANDARD ERRORS FOR PERCENTAGES

MASTER CODES

# >> 1994 CAMPAIGN ISSUES MASTER CODE

- 001 "Domestic issues"
- 006 Child care; DAY CARE; child support
- 045 ABORTION; any reference
- Olo UNEMPLOYMENT, jobs, retraining -- general or national
- Oll Unemployment, lack of jobs in specific area/region/state/industry
- 012 More help for the unemployed
- 020 EDUCATION -- any mention, including quality of schools, cost of college, students not learning anything
- O30 AGED/ELDERLY -- any mention, including Social Security, Medicare, eldercare.
- 040 HEALTH PROBLEMS -- quality of medical care, cost of medical care, availability of medical care, catastrophic health insurance (except AIDS, code 048)
- 048 AIDS
- 050 HOUSING -- providing housing for the poor, the homeless, young people can't buy homes, any mention.
- O55 INFRASTRUCTURE -- Build/maintain roads, bridges, railroads, mass transit systems; transportation NFS
- "POVERTY" has the general thrust of helping the underpriveleged; the 'welfare' code 090 may have connotation of undeserving people on welfare. Thus, 'do more for people on welfare' is a 060 rather than 90. WELFARE --NFS is a 090.
- O60 POVERTY; aid to poor, underprivileged people; help for the (truly) needy; general reference to antipoverty programs; hunger/help for hungry people

- O90 SOCIAL WELFARE; "Welfare"; the welfare mess, too many undeserving on welfare
- 099 OTHER SPECIFIC MENTIONS OF DOMESTIC ISSUES
- 100 Problems of the FARMERS; farm bankruptcies, poor prices for crops, effects of the drought
- Protecting the ENVIRONMENT, POLLUTION, the ozone layer, the greenhouse effect.
- 151 Controlling/REGULATING GROWTH or land development; banning further growth/development in crowded or ecologically sensitive areas; preverving natural areas
- 154 TOXIC WASTE, RADIOACTIVE WASTE
- 160 Need to develop ALTERNATIVE ENERGY SOURCES
- 199 Other specific mentions of AGRICULTURE or ENVIRONMENT problems
- 300 CIVIL RIGHTS/RACIAL PROBLEMS; affirmative action programs; relations between blacks and whites
- WOMEN'S ISSUES -- ERA, equal pay for equal work, maternity leave (except day care, code 006)
- DRUGS -- extent of drug use in U.S; "WAR ON DRUGS"; drugs--NFS; ALCOHOLISM, any mention
- 321 DRUGS -- stopping drugs from coming into this country
- CRIME/VIOLENCE; streets aren't safe; respect for police; releasing criminals early; not enough jails; death penalty
- 367 GUN CONTROL all mentions
- 370 EXTREMIST GROUPS/TERRORISTS
- General mention of MORALITY/TRADITIONAL VALUES; sex, bad language, pornography, teenage pregnancy
- 381 Specific mention of FAMILY VALUES -- latchkey children, divorce; unwed mothers, working mothers
- Homosexual/gay rights; gays in the military [code 048 for mentions of AIDS]
- 384 RELIGION (too mixed up in) and politics; prayer in schools
- 399 OTHER MENTION of race, public order, morality
- 400 INFLATION, high prices, cost of living
- 405 WAGES TOO LOW; minimum wage
- A08 Recession/Depression in specific industries, states or regions -- slump in OIL/STEEL/AUTO INDUSTRY, etc. (except farm, code 101); hard times in this REGION or area
- 410 RECESSION; DEPRESSION, hard times -- no specific locale or industry
- THE DEFICIT; BALANCING THE BUDGET; cutting government spending
- 416 TAXES -- any reference; tax reform
- TOO MANY IMPORTS -- protectionism, competition, outsourcing, problems of auto industry relating to foreign competition; U.S. makes (too) few exports; (high) tariffs imposed by other nations; free trade; GATT
- 427 VALUE OF THE DOLLAR -- strengthening or weakening
- 428 STOCK MARKETS; investments; interest rates
- CLASS ORIENTED ECONOMIC CONCERNS -- middle class getting squeezed; big business too powerful
- Solvency/stability/regulation/control of the nation's FINANCIAL INSTITUTIONS. [1990] Savings and Loan scandals

- 460 IMMIGRATION
- 491 ECONOMICS, THE ECONOMY
- BALANCE OF TRADE; balance of payments; foreign oil dependency (except supply of oil, see 524)
- 499 OTHER MENTION of economic, business or labor problems
- 500 FOREIGN POLICY; FOREIGN AFFAIRS
- 514 LATIN AMERICA, Central America, AID TO CONTRAS (reference to IRAN-CONTRA coded 816)
- 516 AFRICA -- starving people, overpopulation
- 517 SOUTH AFRICA -- Apartheid
- 524 MIDDLE EAST -- Iran hostages, Persian Gulf, supply of mid-east oil (except oil dependency, see 493)
- 530 RUSSIA -- relations with, arms talks, detente; summit, etc.
- 540 FIRMNESS in foreign policy
- 550 U.S. military involvement abroad
- FOREIGN AID; amount of money given to foreign countries; obligation to take care of our problems at home first
- 570 AVOID WAR, establish PEACE -- any reference
- 700 DEFENSE (SPENDING); the military; quality/cost of weapons
- 710 NUCLEAR ARMS RACE -- disarmament, SALT, INF, threat of nuclear war; arms control
- 712 STAR WARS
- 714 SPACE PROGRAM
- 810 Honesty, sincerity of government officials; corruption
- Honesty, sincerity of candidates in general; e.g., "just making promises," "saying whatever it takes to get elected"
- 812 Candidates are just talking (negatively) about each other, MUD SLINGING.
- 813 How well incumbent represents/candidate would REPRESENT THIS DISTRICT
- 814 Congressperson's personal life/morality
- 815 Candidate's ABILITY/EXPERIENCE
- 816 Candidate's (voting) RECORD
- 817 PRESIDENT CLINTON
- 818 BUSH and the IRAN-CONTRA affair
- 819 IRAN-CONTRA affair, mess, scandal, IRAN ARMS DEAL, without reference to Bush
- Which party will control the House of Representatives; other partisan mentions
- Need for change/new blood/fresh ideas in Congress; term limits for members of Congress
- 876 PHILOSOPHICAL DIFFERENCES between the candidates liberal vs. conservative views; balance of authority between state and federal government;
- 900 A local issue or concern -- the college, the dam, the auto-insurance initiative, the leak in our nuclear plant
- 991 1992: OTHER SPECIFIC MENTIONS OF CAMPAIGN ISSUES
- 995 1990: "There were no issues" (except 996); just party politics
- 997 1990: OTHER SPECIFIC MENTIONS OF CAMPAIGN ISSUES
- 996 1992: INAP
  - 1990: "There was no campaign in my district"

[Missing Data]

998 DK

### >> 1994 CAMPAIGN POLITICAL ADVERTISMENTS

# R Pays No Attention To Political Ads

- OO1 R claims not to remember what the ads s/he saw were about NFS (R says only "nothing", "very little/not much", "can't remember", "don't recall", etc. without further explanation or elaboration).
- OO2 R deliberately and actively avoids watching political ads (I hit the mute button/change the channel; I go to the refrigerator, etc.).
- OO3 R does watch the political ads but indicates s/he chooses to pay no attention to them (I don't pay much attention, they don't register on my mind, goes in one ear and out the other, I just laugh at them, I'm immune to them).
  - R GIVE GENERAL ASSESSMENT OF POLITICAL ADS (NO CANDIDATE SPECIFIED)
- O10 AMOUNT/FREQUENCY OF ADS too many of them; they show too many in one evening/time period; see the same ones over and over.
- PROVIDE NO INFORMATION/SERVE NO VALUABLE PURPOSE too vague/general; not specific (enough); not talking about real/important issues; contain only rhetoric/self-serving promotion/platitudes; point out problems but offer no solutions.
- O12 PROVIDE INFORMATION/SERVE VALUABLE PURPOSE talk about (important) issues/candidate's stands on issues; try to present solutions to issues; are enlightening; treat voters like grown-ups.
- Ols DISHONEST/MISLEADING (too) deceitful; tell lies/half-truths/only the facts that help them; try to confuse/hide/avoid the issues; say only what they think the voter wants to hear.
- O14 HONEST/STRAIGHT-FORWARD tells the truth; presents the (real) facts/all the facts; tries to clarify/face the issues; they make sense.
- NEGATIVE CAMPAIGNING (too negative); (too much) backbiting/mudslinging; only try to tear opponents down/make personal attacks on opponent.
- O16 POSITIVE CAMPAIGNING doesn't make personal attacks on opponent; talk about the candidate/why the candidate should be elected.
- 017 HAD NEGATIVE EFFECT ON R made R angry/disgusted; destroyed R's interest in politics/the election; R finds them boring; R is tired of seeing them.

# GENERAL ASSESSMENT, NO SPECIFIC CANDIDATE (CONT'D)

- 018 HAD POSITIVE EFFECT ON R helped R understand the candidate/issues; helped R decide who to vote for.
- O28 OTHER POSITIVE GENERAL ASSESSMENT OF POLITICAL ADS (NO CANDIDATE SPECIFIED)
- O29 OTHER NEGATIVE GENERAL ASSESSMENT OF POLITICAL ADS (NO CANDIDATE SPECIFIED)
- R GIVES GENERAL ASSESSMENT OF BUSH POLITICAL ADS
  - O30 AMOUNT/FREQUENCY OF BUSH ADS too many of them; they show too many in one evening/time period; see the same ones over and over.
  - 031 BUSH ADS PROVIDE NO INFORMATION/SERVE NO VALUABLE

- PURPOSE too vague/general; not specific (enough); not talking about real/important issues; contain only rhetoric/self-serving promotion/platitudes; point out problems but offer no solutions.
- 032 BUSH ADS PROVIDE INFORMATION/SERVE VALUABLE PURPOSE talk about (important) issues/candidate's stands on issues; try to present solutions to issues; are enlightening; treat voters like grown-ups.
- BUSH ADS DISHONEST/MISLEADING (too) deceitful; tell lies/half-truths/only the facts that help them; try to confuse/hide/avoid the issues; say only what they think the voter wants to hear.
- 034 BUSH ADS HONEST/STRAIGHT-FORWARD tells the truth; presents the (real) facts/all the facts; tries to clarify/face the issues; they make sense.
- O35 NEGATIVE CAMPAIGNING BY BUSH (too negative); (too much) backbiting/mudslinging; only try to tear opponents down/make personal attacks on opponent.
- O36 POSITIVE CAMPAIGNING BY BUSH doesn't make personal attacks on opponent; talk about the candidate/why the candidate should be elected.
- 037 BUSH ADS HAD NEGATIVE EFFECT ON R made R angry/disgusted; destroyed R's interest in politics/the election; R finds them boring; R is tired of seeing them.
- 038 BUSH ADS HAD POSITIVE EFFECT ON R helped R understand the candidate/issues; helped R decide who to vote for.
- 039 R REFUSES TO LISTEN TO/WATCH BUSH ADS SPECIFICALLY
- 048 OTHER POSITIVE GENERAL ASSESSMENT OF BUSH POLITICAL ADS
- 049 OTHER NEGATIVE GENERAL ASSESSMENT OF BUSH POLITICAL ADS
- R GIVES GENERAL ASSESSMENT OF CLINTON POLITICAL ADS 050 AMOUNT/FREQUENCY OF CLINTON ADS too many of them; they show too many in one evening/time period; see the same ones over and over.
  - O51 CLINTON ADS PROVIDE NO INFORMATION/SERVE NO VALUABLE PURPOSE too vague/general; not specific (enough); not talking about real/important issues; contain only rhetoric/self-serving promotion/platitudes; point out problems but offer no solutions.
  - O52 CLINTON ADS PROVIDE INFORMATION/SERVE VALUABLE PURPOSE talk about (important) issues/candidate's stands on issues; try to present solutions to issues; are enlightening; treat voters like grown-ups.
  - O53 CLINTON ADS DISHONEST/MISLEADING (too) deceitful; tell lies/half-truths/only the facts that help them; try to confuse/hide/avoid the issues; say only what they think the voter wants to hear.
  - O54 CLINTON ADS HONEST/STRAIGHT-FORWARD tells the truth; presents the (real) facts/all the facts; tries to clarify/face the issues; they make sense.

- NEGATIVE CAMPAIGNING BY CLINTON (too negative); (too much) backbiting/mudslinging; only try to tear opponents down/make personal attacks on opponent.
- O56 POSITIVE CAMPAIGNING BY CLINTON doesn't make personal attacks on opponent; talk about the candidate/why the candidate should be elected.
- O57 CLINTON ADS HAD NEGATIVE EFFECT ON R made R angry/disgusted; destroyed R's interest in politics/the election; R finds them boring; R is tired of seeing them.
- O58 CLINTON ADS HAD POSITIVE EFFECT ON R helped R understand the candidate/issues; helped R decide who to vote for.
- 059 R REFUSES TO LISTEN TO/WATCH CLINTON ADS SPECIFICALLY
- O68 OTHER POSITIVE GENERAL ASSESSMENT OF CLINTON POLITICAL ADS
- 069 OTHER NEGATIVE GENERAL ASSESSMENT OF CLINTON POLITICAL ADS
- R GIVES GENERAL ASSESSMENT OF PEROT POLITICAL ADS
  - O70 AMOUNT/FREQUENCY OF PEROT ADS too many of them; they show too many in one evening/time period; see the same ones over and over.
  - O71 PEROT ADS PROVIDE NO INFORMATION/SERVE NO VALUABLE PURPOSE too vague/general; not specific (enough); not talking about real/important issues; contain only rhetoric/self-serving promotion/platitudes; point out problems but offer no solutions.
  - 072 PEROT ADS PROVIDE INFORMATION/SERVE VALUABLE PURPOSE talk about (important) issues/candidate's stands on issues; try to present solutions to issues; are enlightening; treat voters like grown-ups.
  - O73 PEROT ADS DISHONEST/MISLEADING (too) deceitful; tell lies/half-truths/only the facts that help them; try to confuse/hide/avoid the issues; say only what they think the voter wants to hear.
  - 074 PEROT ADS HONEST/STRAIGHT-FORWARD tells the truth; presents the (real) facts/all the facts; tries to clarify/face the issues; they make sense.
  - 075 NEGATIVE CAMPAIGNING BY PEROT (too negative); (too much) backbiting/mudslinging; only try to tear opponents down/make personal attacks on opponent.
  - 076 POSITIVE CAMPAIGNING BY PEROT doesn't make personal attacks on opponent; talk about the candidate/why the candidate should be elected.
  - 077 PEROT ADS HAD NEGATIVE EFFECT ON R made R angry/disgusted; destroyed R's interest in politics/the election; R finds them boring; R is tired of seeing them.
  - 078 PEROT ADS HAD POSITIVE EFFECT ON R helped R understand the candidate/issues; helped R decide who to vote for.
  - 079 R refuses to listen to/watch Perot ads specifically
  - Other positive general assessment of Perot political ads

- Other negative general assessment of Perot political ads
- R IDENTIFIES SPECIFIC BUSH POLITICAL ADS
  - Bush ad no other details given.
  - Bush ad no content given, but production details remembered (e.g., closeup of face, sitting on edge of desk, it was green).
  - Bush ad "Two Faces of Clinton"/Time magazine cover highlighting two faces.
  - 133 Bush ad computer ad.
  - Bush ad on Bush's record in general.
  - 135 Bush ad attacking Clinton's record in Arkansas.
  - 136 Bush ad on Clinton's draft record/anti-American activities.
  - 137 Bush ad about taxes; saying Bush won't raise taxes (again).
  - 138 Bush ad about Bush's economic plan/promises for the economy.
  - Bush ad Florida relief; giving food to poor countries; Bush portrayed as a caring person.
  - Bush ad family values; families coming together; Bush portrayed as a family man.
  - Bush ad foreign policy accomplishments of the Bush administration; Bush shown as commander-in-chief.
  - Bush ad needs four more years to finish the job.
  - Bush ad clips from the Republican convention.
  - Bush ad average people questioning Clinton's willingness and ability to keep his promised.
  - 149 Bush ad other
- R IDENTIFIES SPECIFIC CLINTON POLITICAL ADS
  - 150 Clinton ad no other details given.
  - Clinton ad no content given, but production details remembered (e.g., closeup of face, waving to crowd, flag in background).
  - 152 Clinton ad attacking Bush's broken promise not to raise taxes; "read my lips -- no new taxes".
  - 153 Clinton ad attacking Bush's handling of the economy; "we can't afford four more years".
  - 154 Clinton ad about creating jobs/putting people back to work.
  - 155 Clinton ad about the need for change; about rebuilding America/putting American on the right course.
  - 156 Clinton ad defending Clinton's record in Arkansas/record on taxes as governor.
  - 157 Clinton ad reforming welfare.
  - 158 Clinton ad showing working people.
  - 159 Clinton ad defending Clinton's draft record.
  - 160 Clinton ad giving address to write to for Clinton's economic plan; experts endorsing Clinton's economic plan.
  - 169 Clinton ad other
- R IDENTIFIES SPECIFIC PEROT POLITICAL ADS
  - 170 Perot ad no other details given.
  - Perot ad no content given, but production details remembered (e.g., sitting behind a desk, scroll with writing, 30 minutes long).
  - 172 Perot ad used a lot of charts and graphs.

- Perot ad describing in general terms problems with the economy/the deficit.
- 174 Perot ad detailed how the deficit would affect future generations.
- Perot ad plans/promises to solve America's problems.
- 176 Perot ad Purple Heart ad
- 189 Perot ad other
- R IDENTIFIES A SPECIFIC EVENT THAT WAS NOT A PRESIDENTIAL POLITICAL AD
  - 190 Other R describes a new event that clearly was not part of a political ad (e.g., Quayle talking about Murphy Brown; Mary Matalin talking about Hillary Clinton).
  - Other R describes a political ad, but one for a congressional, state or local candidate or one concerning a controversial issue (e.g., abortion, gay rights, etc.).

- 998 DK (except 001-003)
- 999 NA

### >> 1994 CANDIDATE NUMBER MASTER CODE

#### SENATE:

- 10 Third party or independent Senate candidate \*\*
- 11 Democratic candidate in open Senate race
- 12 Republican candidate in open Senate race
- 13 Democratic Senate incumbent
- 14 Republican Senate incumbent
- 15 Democratic Senate challenger
- 16 Republican Senate challenger
- 17 Democratic Senator, no race in state
- 18 Republican Senator, no race in state
- 19 Democratic Senator, term not up in state with race
- 21 Democratic Senator--retiring (state with open race)
- 22 Republican Senator--retiring (state with open race)
- 27 Democratic Senator, no race in state
- 28 Republican Senator, no race in state
- 29 Republican Senator, term not up in state with race

## HOUSE:

- 30 Third party or independent House candidate \*\*
- 31 Democratic candidate in open House race
- 32 Republican candidate in open House race
- 33 Democratic House incumbent
- 34 Republican House incumbent
- 35 Democratic House challenger
- 36 Republican House challenger
- Democratic Representative--retiring (district with open race)
- 42 Republican Representative--retiring (district with open race)

### GOVERNOR:

### [NOT USED 1992]

- 50 Third party or independent Gubernatorial candidate \*\*
- 51 Democratic candidate in open Gubernatorial race
- 52 Republican candiate in open Gubernatorial race
- 53 Democratic Gubernatorial incumbent
- 54 Republican Gubernatorial incumbent
- 55 Democratic Gubernatorial challenger
- 56 Republican Gubernatorial challenger
- 57 Democratic governor, no race in state
- Republican governor, no race in state
- 61 Democratic governor--retiring (state with open race)
- 62 Republican governor--retiring (state with open race)

### OTHER:

- 90 Both Democratic and Republican candidates (used in incumbency var only)
- 97 Name given not on Candidate List

#### MISSING DATA:

- 98 DK; refused to name candidate
- 99 NA
- 00 INAP

#### ++VOTED OUTSIDE DISTRICT OF IW:

# DISTRICT WITH NO RUNNING INCUMBENT: (VOTE VAR ONLY)

- 81 Democratic candidate
- 82 Republican candidate

## DISTRICT WITH RUNNING INCUMBENT: (VOTE VAR ONLY)

- 83 Democratic incumbent
- 84 Republican incumbent
- 85 Democratic challenger
- 86 Republican challenger

## ALL DISTRICTS: (VOTE VAR ONLY)

- 80 Third party or independent candidate \*\*
- 91 Democrat--no name given
- 92 Republican--no name given
- \*\* IF 3RD PARTY/INDEPENDENT CANDIDATE NAMED, THIS CODE IS USED ONLY IF NAME APPEARS ON CANDIDATE LIST (IF NAME NOT ON CANDIDATE LIST, CODE 97 IS USED).

NOTE: CODE 97 INCLUDES INSTANCES WHERE R VOTED STRAIGHT MAJOR PARTY TICKET BUT NO CANDIDATE FOR R'S PARTY RAN FOR GIVEN OFFICE (OR: R INSISTS VOTED FOR A MAJOR PARTY'S CANDIDATE BUT NO CANDIDATE RAN FOR GIVEN OFFICE REPRESENTING NAMED MAJOR PARTY).

++ CODES 80-86,91,92 ARE NOT USED IN VARS OTHER THAN

VOTE VARS.

GENERAL NOTE: IN THOSE QUESTIONS WHERE R IS NOT READ NAMES OF CANDIDATES BUT R SUPPLIES A CANDIDATE NAME OF HIS/HER OWN CONSTRUCTION [I.E., IN RECALL, 'MOST IMPORTANT PROBLEM IN DISTRICT' HOUSE CANDIDATE], RESPONDENTS SOMETIMES IN ERROR GIVE NAMES OF CANDIDATES FOR OTHER OFFICES OR NAMES OF NONRUNNING OFFICEHOLDERS. IF SUCH A NAME IS DETERMINED TO BE APPROPRIATE FOR R'S STATE/CD AND THE NAME IS CODEABLE FROM THE CANDIDATE LIST USED, WHEREVER POSSIBLE THE 'INCORRECT' NAME IS STILL CODED. (However, see \*\* for 3rd/party and independent candidates). [NOTE: If R names candidates from districts other than district corresponding to R's sample location, those candidates' codes are not coded--97 is used.]

# >> 1994 BALLOT CARDS AND CANDIDATE LISTS

### BALLOT CARD 1994

The 1994 study included an experiment in the layout of the Ballot Card. Respondents were presented alternative versions of the ballot identical in content, but different in design. For sample ballots please contact the NES study staff.

- 97 Candidate name given but office and party NA
- 98 DK
- 99 NA
- +++ NAMES USED ONLY IN ERROR BY R
- $^{\star\star\star}$  TO BE USED ONLY WHEN CANDIDATE APPEARS ON CANDIDATE >> 1990 CENSUS DEFINITIONS

THIS NOTE CONTAINS DEFINITIONS OF THE FOLLOWING TERMS USED BY THE 1990 U.S. CENSUS OF POPULATION:

Metropolitan Statistical Areas Consolidated Metropolitan Statistical Areas Urbanized Areas Places Incorporated Places Unincorporated Places

#### 1. "METROPOLITAN STATISTICAL AREAS (MSA's):"

The general concept of a metropolitan area is one of a large population nucleus, together with adjacent communities that have a high degree of economic and social integration with that nucleus.

In 1990 the U.S. Office of Management and Budget (OMB) and the U.S. Census have used the term Metropolitan Statistical Area (MSA) for what in 1980 was referred to as Standard Metropolitan Statistical Area (SMSA). An attempt has been made by the study staff to be consistent in using the newer terms in the current documentation and definitions. The definitions of characteristics to be classified as a metropolitan area have remained fairly consistent—with only minor changes between 1980 and 1990. However, due to changes in population size and density, employment, commuting and other behavior which defines metropolitan areas, the specific geographical composition of any given metropolitan area has, of course, frequently changed. The specific MSA title may also have changed as to which cities are named and in what order.

Each MSA has one or more central counties containing the area's main population concentration: an urganized area with at least 50,000 inhabitants. An MSA may also include outlying counties that have close economic and social relationships with the central counties. The outlying counties must have a specified level of commuting to the central counties and must also meet certain standards regarding metropolitan character, such as population density, urban population and population growth. In New

England, MSA's are composed of cities and towns rather than whole counties.

The population living in MSA's may also be referred to as the metropolitan population. The population is subdivided into "inside central city (or cities)" and "outside central city (or cities)." (The population living outside MSA's constitutes the non-metropolitan population.) Most MSA's have one to three CENTRAL CITIES that are named in the census title of the MSA.

# 2. "CONSOLIDATED METROPOLITAN STATISTICAL AREAS (CMSA's):"

In some parts of the country, metropolitan development has progressed to the point that adjoining MSA's are themselves socially and economically interrelated. These areas are designated consolidated metropolitan statistical areas (CMSA's) by the Office of Management and Budget, and are defined using standards included as part of the new MSA standards described above. MSA's that are a part of a CMSA are referred to as primary metropolitan statistical areas (PMSA's).

Definitions of the six largest CMSA's:

NEW YORK-NORTHERN NEW JERSEY-LONG ISLAND, NY-NJ-CT, CMSA

Bergen-Passaic, NJ PMSA
Bridgeport-Milford, CT PMSA
Danbury, CT PMSA
Jersey City, NJ PMSA
Middlesex-Somerset-Hunterdon, NJ PMSA
Monmouth-Ocean NJ PMSA
Nassau-Suffolk, NY PMSA\*
New York, NY PMSA\*
Newark, NJ PMSA\*
Norwalk, CT PMSA
Orange County, NY PMSA
Stamford, CT PMSA

LOS ANGELES-ANAHEIM-RIVERSIDE, CA, CMSA

Anaheim-Santa Ana, CA PMSA\* Los Angeles-Long Beach, CA PMSA\* Oxnard-Ventura, CA PMSA Riverside-San Bernardino, CA PMSA\*

CHICAGO-GARY-LAKE COUNTY (IL), IL-IN-WI CMSA

Aurora-Elgin, IL PMSA\* (Kane Co part only) Chicago, IL PMSA\* Gary-Hammond, IN PMSA Joliet, IL PMSA\* (Will Co part only) Kenosha, WI PMSA Lake County, IL PMSA\*

SAN FRANCISCO-OAKLAND-SAN JOSE, CA, CMSA
Oakland, CA PMSA\*
San Francisco, CA PMSA\*
San Jose, CA PMSA
Santa Cruz, CA PMSA

Santa Cruz, CA FMSA Santa Rosa-Petaluma, CA PMSA Vallejo-Fairfield-Napa, CA PMSA PHILADELPHIA-WILMINGTON-TRENTON, PA-NJ-DE-MD, CMSA
Philadelphia, PA-NJ, PMSA\*
Trenton, NJ PMSA
Vineland-Millville-Bridgeton, NJ PMSA
Wilmington, DE-NJ-MD PMSA

DETROIT-ANN ARBOR, MI, CMSA
Ann Arbor, MI PMSA
Detroit, MI PMSA\*

\* In the SRC 1980 National Sample (1992 NES sample).

For the purpose of size and distance coding of suburbs and non-MSAs, the central cities of the six largest CMSAs are listed as:

- New York City (Bronx, Brooklyn, Manhattan, Queens), NY, Elizabeth, NJ and Newark, NJ
- 2. Los Angeles, Long Beach, Pasadena, Pomona, Burbank, Anaheim, Santa Ana, Riverside, San Bernardino and Palm Springs, CA.
- 3. Chicago, Evanston and Chicago Heights, Aurora, Elgin, Joliet, Waukegan and North Chicago, IL
- 4. San Francisco, Oakland, Berkeley and Livermore, CA
- 5. Philadelphia and Norristown, PA and Camden, NJ
- 6. Detroit, Dearborn, Pontiac and Port Huron, MI

Both the CMSA definitions and the central city designations above are from Metropolitan Statistical Areas, 1990, U.S. Office of Management and Budget, Washington, DC (Jun 1990) (PB90-214420)

### 3. "URBANIZED AREAS:"

The major objective of the Census Bureau in delineating urbanized areas is to provide a better separation of urban and rural population in the vicinity of large cities. An urbanized area consists of a central city or cities, and surrounding closely settled territory ("urban fringe").

### 4. "PLACES:"

Two types of places are recognized in the census reports--incorporated places and unincorporated places, defined as follows:

#### 5. "INCORPORATED PLACES:"

These are political units incorporated as cities, borought, towns and villages with the following exceptions: (a) boroughs in Alaska; and (b) towns in New York, Wisconsin and the New England states.

#### 6. "UNINCORPORATED PLACES:"

The Census Bureau has delineated boundaries for closely settled population centers without corporate limits. Each place so delineated possesses a definite nucleus of residences and has its boundaries drawn to include, if feasible, all the surrounding closely settled area. These are called Census Designated Places (CDP's).

#### >> 1980 CENSUS OCCUPATION CODE

The full 3-digit 1980 Census Occupation Code was used to code the occupation of respondents. In order to minimize the amount of highly specific information released about respondents, the full occupation code has been recoded to a 71 category code, which is based on the occupation code sub-headings in the Census Code.

Users who need access to the full 3-digit occupation code for their research purposes should contact NES project staff for details about how this could be arranged.

In the code description that follows, the full 1980 Census Code is presented. At the beginning of each recoded section, the statement "(XXX) THROUGH (YYY) ARE RECODED TO (ZZ)" indicates the code values to which the specific occupations have been recoded. For example, purchasing managers (009), legislators (003), and funeral directors (018) have all been recoded to (01). Numbers in parentheses following the occupation categories are the U.S. Department of Commerce's 1980 Standard Occupational Classification code equivalents. The abbreviation "pt" means "part" and "N.E.C." means "not elsewhere classified".

#### MANAGERIAL AND PROFESSIONAL SPECIALTY OCCUPATIONS

Executive, Administrative, and Managerial

# (003) THROUGH (019) ARE RECODED TO: 01

- 003 LEGISLATORS (111)

  004 CHIEF EXECUTIVES AND GENERAL ADMINISTRATORS, PUBLIC ADMINISTRATION (112)

  005 ADMINISTRATORS AND OFFICIALS, PUBLIC ADMINISTRATION

## >> 1980 CENSUS INDUSTRY CODE

NUMBERS IN PARENTHESES FOLLOWING INDUSTRY CATEGORIES ARE THE U.S DEPT. OF COMMERCE 1972 STANDARD INDUSTRIAL CLASSIFICATION (SIC) DEFINITIONS. THE ABBREVIATION "PT" MEANS "PART" AND "N.E.C." MEANS "NOT ELSEWHERE CLASSIFIED."

### AGRICULTURE, FORESTRY, AND FISHERIES

- 010 AGRICULTURAL PRODUCTION, CROPS (01)
- 011 AGRICULTURAL PRODUCTION, LIVESTOCK (02)
- O20 AGRICULTURAL SERVICES, EXCEPT HORTICULTURAL (07, EXCEPT 078)
- 021 HORTICULTURAL SERVICES (078)
- 030 FORESTRY (08)
- 031 FISHING, HUNTING, AND TRAPPING (09)

# MINING

- 040 METAL MINING (10)
- 041 COAL MINING (11, 12)
- 042 CRUDE PETROLEUM AND NATURAL GAS EXTRACTION (13)
- 050 NONMETALLIC MINING AND QUARRYING, EXCEPT FUEL (14)
- 060 CONSTRUCTION (15, 16, 17)

#### MANUFACTURING

# NONDURABLE GOODS: FOOD AND KINDRED PRODUCTS

- 100 MEAT PRODUCTS (201)
- 101 DAIRY PRODUCTS (202)
- 102 CANNED AND PRESERVED FRUITS AND VEGETABLES (203)
- 110 GRAIN MILL PRODUCTS (204)
- 111 BAKERY PRODUCTS (205)
- 112 SUGAR AND CONFECTIONERY PRODUCTS (206)
- 120 BEVERAGE INDUSTRIES (208)
- MISCELLANEOUS FOOD PREPARATIONS AND KINDRED PRODUCTS (207, 209)

- 122 NOT SPECIFIED FOOD INDUSTRIES
- 130 TOBACCO MANUFACTURES (21)

## NONDURABLE GOODS: TEXTILE MILL PRODUCTS

- 132 KNITTING MILLS (225)
- 140 DYEING AND FINISHING TEXTILES, EXCEPT WOOL AND KNIT GOODS (226)
- 141 FLOOR COVERINGS, EXCEPT HARD SURFACE (227)
- 142 YARN, THREAD, AND FABRIC MILLS (228, 221-224)
- 150 MISCELLANEOUS TEXTILE MILL PRODUCTS (229)

# NONDURABLE GOODS: APPAREL AND OTHER FINISHED TEXTILE PRODUCTS

- APPAREL AND ACCESSORIES, EXCEPT KNIT (231-238)
- 152 MISCELLANEOUS FABRICATED TEXTILE PRODUCTS (239)

# NONDURABLE GOODS: PAPER AND ALLIED PRODUCTS

- 160 PULP, PAPER, AND PAPERBOARD MILLS (261-263, 266)
- 161 MISCELLANEOUS PAPER AND PULP PRODUCTS (264)
- 162 PAPERBOARD CONTAINERS AND BOXES (265)

# NONDURABLE GOODS: PRINTING, PUBLISHING AND ALLIED INDUSTRIES

- 171 NEWSPAPER PUBLISHING AND PRINTING (271)
- PRINTING, PUBLISHING AND ALLIED INDUSTRIES, EXCEPT NEWSPAPERS (272-279)

## NONDURABLE GOODS: CHEMICALS AND ALLIED PRODUCTS

- 180 PLASTICS, SYNTHETICS, AND RESINS (282)
- 181 DRUGS (283)
- 182 SOAPS AND COSMETICS (284)
- 190 PAINTS, VARNISHES, AND RELATED PRODUCTS (285)
- 191 AGRICULTURAL CHEMICALS (287)
- 192 INDUSTRIAL AND MISCELLANEOUS CHEMICALS (281, 286, 289)

# NONDURABLE GOODS: PETROLEUM AND COAL PRODUCTS

- 200 PETROLEUM REFINING (291)
- 201 MISCELLANEOUS PETROLEUM AND COAL PRODUCTS (295, 299)

# NONDURABLE GOODS: RUBBER AND MISCELLANEOUS PLASTICS PRODUCTS

- 210 TIRES AND INNER TUBES (301)
- OTHER RUBBER PRODUCTS, AND PLASTICS FOOTWEAR AND BELTING (302-304, 306)
- 212 MISCELLANEOUS PLASTIC PRODUCTS (307)

# NONDURABLE GOODS: LEATHER AND LEATHER PRODUCTS

- 220 LEATHER TANNING AND FINISHING (311)
- 221 FOOTWEAR, EXCEPT RUBBER AND PLASTIC (313, 314)
- LEATHER PRODUCTS, EXCEPT FOOTWEAR (315-317, 319)

```

- Other specific references to health problems; AIDS
- O50 HOUSING; providing housing for the poor/homeless; ability of young people to afford to buy homes/find homes to buy
- O60 POVERTY; aid to the poor/underprivileged people; help for the (truly) needy; welfare programs (such as ADC); general reference to anti-poverty programs; hunger/help for hungry people in the U.S.
- 090 SOCIAL WELFARE PROBLEMS; "welfare"--NFS
- 091 For general or other social welfare programs; "we need to help people more"
- O92 Against general or other social welfare programs; "too many give away programs for the people who don't deserve it"
- 099 Other specific mentions of social welfare problems

#### AGRICULTURE

- 100 FARM ECONOMICS; payment for crops/price of feed/cost of farming
- 103 SUBSIDIES/crop payments/government aid to farmers
- WORLD FOOD PROBLEMS; food shortages/starvation/famine (not 406 or 407)

## NATURAL RESOURCES

- 150 CONSERVATION OF NATURAL RESOURCES; conservation, ecology; protecting the environment/endangered species
- 151 Controlling/REGULATING GROWTH or land development; banning further growth/development in crowded or ecologically sensitive areas; preserving natural areas
- 153 POLLUTION; clean air/water
- Disposal of RADIOACTIVE/TOXIC waste (dumps, landfills)
- DEVELOPMENT OF NATURAL RESOURCES /ENERGY SOURCES; harbors, dams, canals, irrigation, flood control, navigation, reclamation; location, mining, stock-piling of minerals; water power, atomic power; development of alternative sources of energy (includes mentions of solar or nuclear power)

# Agriculture OR Natural Resources:

199 OTHER SPECIFIC MENTIONS OF AGRICULTURE OR NATURAL RESOURCES PROBLEMS

#### LABOR: UNION-MANAGEMENT RELATIONS

- 200 LABOR/UNION PROBLEMS; union practices; job security provided workers; job safety issues; working conditions
- 220 Anti-union; unions too powerful
- 299 Other specific mention of labor or

union-management problems

### RACIAL

- 300 CIVIL RIGHTS/RACIAL PROBLEMS; programs to enable Blacks to gain social/economic/educational/ political equality; relations between Blacks and whites
- PROTECTION (expansion) OF WHITE MAJORITY; maintenance of segregation; right to choose own neighborhood; right to discriminate in employment
- 304 Discrimination against whites; preferred treatment given to minorities

#### PUBLIC ORDER

- NARCOTICS; availability of drugs; extent of drug/alcohol addiction in the U.S.; interdiction of drugs coming to the U.S. from foreign countries; alcohol or drug related crime
- WOMEN'S RIGHTS; ref. to women's issues; economic equality for women; ERA
- O45 PRO-ABORTION; pro-choice; the right of a woman to control her body
- CRIME/VIOLENCE; too much crime; streets aren't safe; mugging, murder, shoplifting; drug related crime
- LAW AND ORDER; respect for the law/police; support for the police; death penalty; tougher sentences for criminals; need for more prisons
- Against unregistered ownership of guns; legislative control of guns; "CONTROL OF GUNS"-NFS
- 368 For gun ownership; right to have guns; against gun control
- 370 EXTREMIST GROUPS/TERRORISTS; terrorist bombings/hostage-taking; political subversives; revolutionary ideas/approaches
- General mention of MORAL/RELIGIOUS DECAY (of nation); sex, bad language, adult themes on TV
- Family problems--divorce; proper treatment of children; decay of family (except 006); child/elder abuse (incl. sexual)
- 046 ANTI-ABORTION; pro-life; "abortion"--NFS
- Problems of/with YOUNG PEOPLE; drug/alcohol abuse amoung young people; sexual attitudes; lack of values/discipline; mixed-up thinking; lack of goals/ambition/sense of responsibility
- 384 Religion (too) mixed up in politics; prayer in school
- 385 HOMOSEXUALITY; protecting civil rights of gays and lesbians; accepting the lifestyle of homosexuals; granting homosexual couples the same rights and benefits as heterosexual couples

# Racial OR Public Order OR Other Domestic:

399 OTHER SPECIFIC MENTION OF RACIAL OR PUBLIC ORDER PROBLEMS; OTHER MENTION OF DOMESTIC ISSUES

# ECONOMIC AND BUSINESS

If R mentions both "inflation" (400) and rise in prices of specific items (407-

# 409), code "inflation" (400). [SEE ALSO 496]

- 400 INFLATION; rate of inflation; level of prices; cost of living
- 401 WAGE AND PRICE CONTROLS/GUIDELINES; freezing prices; control of business profits
- 403 High price of food, all mentions (exc. 100)
- 404 High price of other specific items and services
- 405 MINIMUM WAGE, any mention; any mention of wage levels
- 407 Food shortages; economic aspects of food shortages, e.g., price of sugar (other references, code 120)
- 408 Fuel shortages; "energy crisis"; oil companies making excessive profits; depressed condition of the oil industry
- 410 RECESSION, DEPRESSION; prosperity of the nation; economic growth; GNP
- 411 MONETARY RESTRAINTS/CONTROLS; level of interest rates; availability of money/the money supply
- Against (increased) government spending; balancing of the (national) budget; against government stimulation of the economy; the size of the budget deficit
- TAXES; general reference to tax structure; tax surcharge (NA R's direction); tax reform; other specific tax reference
- 417 For tax cuts; against tax surcharge; for tax reform
- 418 Against tax cuts; for tax surcharge; against tax reform
- 424 PRODUCTIVITY of American industry; "giving a day's work for a day's pay"; revitalizing American industry
- 425 STOCK MARKET/GOLD PRICES; all references to gold prices, stock brokers, stock fluctuations, etc.
- 427 VALUE OF THE DOLLAR; strength/weakness of the dollar against other currencies
- 433 Large businesses taking over small businesses
- Class oriented economic concerns--middle class, working class (pro); MIDDLE CLASS GETTING SQUEEZED
- 441 Class oriented economic concerns--big business, monied interests (anti) too powerful
- Concern for inequitable distribution of wealth; gap between the rich and the poor; concentration of wealth in the hands of a few
- 451 For the regulation of interstate commerce, transportation, air travel, railways, government auto safety regulations; in favor of increased government regulation of business; mention of problems caused by deregulation
- 452 Against (increased) regulation of interstate commerce, transportation; AIR TRAVEL, RAILWAYS, etc.
- Solvency/stability/regulation/control of the nation's FINANCIAL INSTITUTIONS. [1990] Savings and Loan scandal
- IMMIGRATION POLICY; establishing limits on how many people from any one nation can enter the U.S.; prohibiting specified types of persons from

- entering the U.S.
- Problems relating to the influx of political/economic refugees (Cubans, Haitians, Mexicans, etc.)
- 491 Economics--general; "Economics"--NFS
- 492 International economics--general
- 493 U.S. foreign trade, balance of payments position; foreign oil dependency
- Control of FOREIGN INVESTMENT IN U.S.; mention of foreigners buying U.S. assets (businesses, real estate, stocks, etc)
- 495 PROTECTION OF U.S. INDUSTRIES; imposition of tariffs/reciprocal restrictions on foreign imports; limitation of foreign imports; mention of problems in specific industries competin with foreign manufacturers
- The economy--not further specified (code specific mention if R clarifies by saying "inflation", etc.; also see 400)
- International competitiveness; outsourcing; loss of jobs to foreign competition; moving jobs abroad; modernizing plants/equipment/management techniques to meet foreign competition; matching the quality of foreign goods
- 498 Mention of "twin problems" of a large national debt/budget deficit and unfavorable balance of trade/import-export ratio
- 499 Other specific mention economic or business problems

# FOREIGN AFFAIRS

- 500 FOREIGN RELATIONS/FOREIGN AFFAIRS; foreign policy/relations, prestige abroad
- Relations with the Third World (no specific country or region mentioned)
- Relations with WESTERN EUROPE; Great Britain, France, Germany; our allies
- 510 VIETNAM; general reference to "the war," Indochina, Cambodia; aid
- 514 Latin America, South America--any references; reference to war/situation in Nicaragua; U.S. support of the Contras
- 515 Iran; mention of American hostages in Teheran; arms deal
- 516 African countries; developing areas in Africa (not 518)--any mention; U.S. response to apartheid in South Africa
- 519 Other specific countries/areas/trouble spots (exc. 520's, 530's)
- MIDDLE EAST-- support or aid to Israel/Arab states; Arab/Israeli conflict; Iran-Iraq war; hostages in Lebanon/Middle East. [1990] Iraqi aggression in the Persian Gulf
- S30 RUSSIA/Eastern Europe; relations with Russia/the Communist bloc; detente/trade/negotiations with Russia -- NA whether 531 or 532
- For PEACEFUL RELATIONS with Russia/Detente/Eastern Europe; for increased TRADE with Russia; talking/resuming negotiations with Russia on arms

- control/reduction (reaching/concluding a treaty is
  711)
- Against policy of Detente with Russia; COLD WAR; threat of external Communism; need to oppose/be wary of Russia
- Prevention of Russian (Communist) expansion; mention of Soviet invasion and occupation of Afghanistan-- any reference; references to Soviet activity in Central America/Nicaraqua)
- Other specific references to
  Russia/Detente/Eastern Europe, etc. (including
  changing site/boycotting 1980 Moscow Olympics);
  threat of/preventing war with Russia (exc. 714)
- FIRMNESS IN FOREIGN POLICY; maintenance of position of MILITARY/DIPLOMATIC STRENGTH (not 710-712)
- U.S. FOREIGN (MILITARY) INVOLVEMENT/COMMITMENT, extent of U.S. Foreign involvement; military assistance/aid (exc. 524)
- 560 U.S. FOREIGN (ECONOMIC) INVOLVEMENT/COMMITMENTS; extent of U.S. (foreign) economic aid; "foreign aid"
- 570 Prevention of war; ESTABLISHMENT OF PEACE; any reference
- Obligation to TAKE CARE OF PROBLEMS AT HOME before helping foreign countries
- 599 Other specific mention of foreign affairs problems

#### NATIONAL DEFENSE

- 700 NATIONAL DEFENSE; defense budget; level of spending on defense
- 710 DISARMAMENT; general reference to ENDING OF THE ARMS RACE; nuclear proliferation; test ban treaty (not 540); SALT; INF treaty
- 711 For DISARMAMENT; for extension of test ban treaty; support toward ending of arms race; against (additional) expenditures on military/arms development; SALT; SDI ("Star Wars"); INF treaty
- Against (increased) policy of DISARMAMENT; against test ban treaty; for additional WEAPONS DEVELOPMENT; missile program; scientific/ technological development in weapons/strategy; atomic bomb testing; increased DEFENSE BUDGET, increased arms expenditure (not 540); SALT; increased pay for military personnel; SDI ("Star Wars"); INF treaty
- 713 General or specific references to functioning and performance of defense; waste, inefficiency (not codable in 710-712)
- 714 Nuclear war; the threat of nuclear war; nuclear proliferation
- 740 The space program; space race (not 711,712)
- 750 MORALE OF NATION; Patriotism; National spirit; national unity; greed, selfishness of people
- 760 BENEFITS FOR VETERANS; general reference
- 765 Allowing/accepting GAYS IN THE MILITARY
- 799 Other specific mention of national defense problems

#### ISSUES RELATING TO THE FUNCTIONING OF GOVERNMENT

800 POWER OF THE (FEDERAL) GOVERNMENT; power of/control exercised by the federal government (LACK OF) HONESTY IN GOVERNMENT; (LACK OF) ETHICS 810 IN GOVERNMENT--general reference (exc. 811) LACK OF PERSONAL ETHICS/morality of persons 811 related to or part of government 820 CAMPAIGN DONATIONS/PUBLIC FINANCING OF ELECTIONS; any mentions 830 CONFIDENCE/TRUST in political leaders/system; wisdom, ability, responsiveness of political leaders; quality of leadership provided by political leaders 833 QUALITY/EFFICIENCY of public employees, diplomats, civil service; SIZE OF THE GOVERNMENT BUREAUCRACY; COST OF GOVERNMENT  ${\tt COMPENSATION;} \ {\tt all} \ {\tt references} \ {\tt to} \ {\tt the} \ {\tt compensation}$ 836 of government employees, officials, congressmen, judges, local politicians/ bureaucrats 837 Waste in government spending; keeping tabs on where money goes 838 Government BUDGET PRIORITIES are wrong; Congress/President is spending money in the wrong areas/not spending money on the right things SIZE OF FEDERAL GOVERNMENT; the (large) size of 840 government/civil service/bureaucracy; the number of government departments/employees/programs 853 POWER OF CONGRESS--general reference 856 POWER OF THE SUPREME COURT, all other references to the Supreme Court except 857, 858 Other specific references to the (federal) balance 859 of power; legislative gridlock in Washington 862 FAIR ELECTION PROCEDURES; prevention of vote manipulation; curbing of political "bosses", smear campaigns 869 Other specific references to problems of representation; term limitations for members of Congress 874 Lack of support for the President; any anti-President comments, negative reference to the PRESIDENT's quality, style, etc. 878 Mention of a specific CANDIDATE or relative of a candidate -- NFS 881 New president/administration geetting started; other references specific to the President 885 PUBLIC APATHY/disinterest--all references 887 Extending/protecting EQUAL RIGHTS, basic freedoms, human rights of all citizens 899 Other specific mention of problems relating to the functioning of government OTHER 995 1990-91: "There were no issues"; "there were no issues, just party politics" 996 1990-91: "There was no campaign in my district" Other specific mentions of important problems

997

998 DK

999 NA

000 INAP; No further mention; no problems

#### NOTE 12: LIBERAL/CONSERVATIVE CODE

#### GENERAL PHILOSOPHY

- O10 ACCEPTANCE OF CHANGE/new ideas; less bound to status quo, more open to new ideas/ways of doing things; flexible, innovative, "modern", progressive
- 110 RESISTANCE TO CHANGE/new ideas; stick to (protect) status quo, resist new ways of doing things; rigid, set in ways, old-fashioned
- QUICK (RASH) RESPONSE to problems; tackle problems quickly; impetuous, impulsive, (too) aggressive, take more chances, not cautious (enough)
- 120 Slow (cautious) response to problems, do-nothing, lets things go, avoid risk
- O21 IRRESPONSIBLE; does not worry about consequences; "anything goes" attitude
- 121 THOUGHTFUL; worries about consequences
- O30 Independence of thought, ideas; think on their own; don't (always) follow party directives; outspoken activist, go-getters; look at both sides of question; more likely to compromise/give and take on an issue
- Don't think independently; compliant, disciplined, follow party directives; look at only one side of issues
- O35 Consistent; takes firm stands; decisive; determined; stubborn
- 135 Inconsistent, they switch positions/do not take
   firm stand on issues; are indecisive
- O40 FOR EQUALITY, equal rights for everybody; "no 'stuffed shirts"'"; talk on people's level; willing to listen to people, people like me
- 140 ELITIST; favors maintaining special privileges for some
- 050 EXTREME, RADICAL, far left (not further specified)
- MODERATE, middle-of-road, less extreme (not further specified)
- 155 REACTIONARY, far right (not further specified)
- O60 Cares about giving to, helping others; compassionate; generous; do-gooder
- 160 Self-centered, cares primarily about self
- 061 SENSITIVE TO SOCIAL PROBLEMS; concerned with social reform; interested in improving social

conditions; for equalizing distribution of income 161 UNAWARE OF SOCIAL PROBLEMS; not favoring social reform; not interested in improving social conditions; against equalizing/redistribution of income \_\_\_\_ 070 Future-oriented, plan ahead, look to the future 170 Not future-oriented, don't plan ahead, don't worry about the future; short-sighted 071 Idealist, not realistic about what is possible 171 Pragmatic; down to earth, realistic 080 Socialistic, for welfare state, for social welfare programs, for government intervention in social problems; leaves less to (interferes more with) private enterprise FOR FREE ENTERPRISE, capitalism, against socialism 180 (code "help big business" under group references); for development of private enterprise, against government expansion into areas of private enterprise; against government intervention in social problems, leaves individuals to fend off on their own 081 Depends (too much) on federal government (rather than state or local government); (TOO) CENTRALIZED, paternalism, want Washington to do everything 181 For states' rights, local government, less interference from Washington at local level, against powerful federal government 082 DESTROY PERSONAL INITIATIVE/individual responsibility/individual dignity; recognize individual needs government help 182 Initiative/Responsibility/Dignity of individual protected \_\_\_\_ 083 Humanistic; care (more) about people; for the benefit of the person 183 Less/Not humanistic; less/not concerned about people \_\_\_\_ 084 Patriotic, nationalist; looks out for good of our country; pride in government/country/Constitution; has the country's interest at heart 184 Less patriotic, less nationalist; not enough pride in government/ country/Constitution; willing to take care of other people (e.g., refugees) before taking care of people at home 085 Definite moral standards/stands; concern for/control of public morality 185 Freedom to do as one chooses; less interested in strict control of social behavior; not interested in setting moral standards

(Good) Christian; strong religious beliefs

Not religious

086

186

----

- O87 Adhere to/uphold/respect the Constitution; live up to/stick to what the Constitution says
- Deviate from/ignore/don't respect the Constitution; interpret the Constitution to suit their needs; ignore the Constitution when it suits their purposes
- O88 Support/uphold/defend the Bill of Rights; protect the right to freedom of speech/press/religion, etc.; support the ACLU
- Seek to curtail/fail to protect/unwilling to observe the Bill of Rights; willing to put limits in freedom of speech/press/ religion, etc.; doesn't support the ACLU

  General Philosophy (continued)
- 089 (More) Concerned about HUMAN RIGHTS; places (greater) importance on the protection of human rights.
- 189 Less/not concerned about HUMAN RIGHTS; does not place/places less importance on the protection of human rights.
- Other general philosophy reference pertaining to liberals
- 190 Other general philosophy reference pertaining to conservatives

#### FISCAL AND ECONOMIC POLICY REFERENCES

- Fiscal Policy--Easy Spending Responses
- 400 SPEND MORE FREELY/high spenders (NFS); liberal economic policy; favor government spending
- Spend much relative to what is accomplished, WASTEFUL, not careful with spending
- Spend much relative to money available; SPEND US DEEPER IN DEBT
- 403 Spend under special circumstances, such as hard times
- 404 Bring cheap money, MORE MONEY CIRCULATING
- 405 Other easy spending responses
- Want to RAISE TAXES--NFS; want to keep taxes high/increase government revenues
- 407 Will increase INCOME TAXES; will not cut income taxes; will rely on increase in/high income tax to provide government revenues
- Fiscal Policy--Cautious Spending Responses
- 500 Spend less freely, economize in government (NFS); tight economic policy; oppose government spending
- Spend little relative to what is accomplished, LESS WASTEFUL/more careful with government (taxpayers') money
- 502 Spend little relative to money available, REDUCE DEBT; keep debt from getting higher, balanced budget
- 503 Spend little even when special circumstances might warrant

- 504 FOR SOUND MONEY, tight money, deflation 505 Other cautious spending responses 506 Want to CUT TAXES--NFS; want to keep taxes low/decrease government revenues 507 Will cut INCOME TAXES; will not increase income taxes; will rely on taxes other than income tax to provide government revenue 512 Favor (too much) GOVERNMENT CONTROL OVER ECONOMY; doesn't let business get more involved/handle problems of poverty/ unemployment, etc. 412 Don't favor (too much) government control over economy; LETS BUSINESS GET MORE INVOLVED/handle problems of poverty/ unemployment, etc. 490 Other reference to fiscal and economic policy 435 Propose/enact FAIR TAXES; believe everyone should be taxed the same/that taxes should be even-handed 535 Propose/enact UNFAIR TAXES; show favoritism/give tax breaks to certain groups or types of people 436 Give tax breaks to the poor/working/middle class people; tax policies favor the lower/middle classes 536 Give tax breaks to the wealthy/corporations; tax policies favor the rich/powerful/upper classes SPECIFIC DOMESTIC POLICIES FAVORED BY LIBERAL/CONSERVATIVE 600 MINIMUM WAGE LEGISLATION; favors raising minimum wage, or favors raising unemployment compensation SOCIAL SECURITY, government pension rates 601 603 FULL EMPLOYMENT policies; government committment to provide a job for everyone who wants to work 610 MEDICAL (HEALTH) INSURANCE, medical care for the aged, socialized medicine, Medicare 620 Government control of UTILITIES, more attention to conservation; public works, mention of ecology, environment 630 Federal AID TO EDUCATION/school-building, teachers' pay higher 631 Busing; forced integration 632 Other federal control of education or schools response 633 Prayer in schools 640 CIVIL RIGHTS, insist more strongly on civil rights 641 Law and order--hard line (or NA line); want a police state; support death penalty (88) 642 Law and order--soft line; oppose death penalty (88)643 Property rights, OPEN HOUSING 644 Policies which would divide country, have civil war, race war 650 Higher TARIFFS, less free trade 660 "Wet" legislation, ANTI-PROHIBITION 670 General mention of social welfare, "give-away programs" 671 POVERTY program 672 EMPLOYMENT (job) training programs, job corps,

Provides for/support/spend (more) for child care or parental leave policy; license/fund day care

etc.

#### PARTY OR CANDIDATE -- GOVERNMENT ACTIVITY / PHILOSOPHY

- 0801 General assessment of ideas/policies/stands (unspecified)
- 0802 Different from other party/candidate
- 0803 Same as other party/candidate; not different enough
- 0804 (Too) negative; always tearing down other side; no solutions of his/their own
- O805 For government activity; believe government should take care of things; for big government; supports social programs/ spending (not 0905-0907)
- O806 Against government activity; believe government involved in too many things; favors reduction in social programs/ spending (not 0905-0907)
- 0807 Humanistic; favor human beings over property rights
- 0808 Not humanistic; favor property rights over human beings
- 0809 Favor social change/reform/progress/improvement of social conditions
- 0810 Against social change/reform/progress/improvement of social conditions
- 0811 Socialistic
- 0812 Anti-socialistic
- O813 Communistic/soft/hard-liner on Communism/apologist for Communists/dupe
- 0814 (Too) anti-communistic/hard-liner on Communism
- 0815 (Too) liberal (except 0531 or 0533)
- 0816 (Too) conservative (except 0532 or 0534)
- 0817 Moderate/middle of the road/for slow change; not an extremist/fanatic
- 0818 Extremist/fanatic/too far out; not too moderate/not a fence-sitter
- O819 Pro-Far Right/Birchers/reactionaries; encouraging fascist/ police state
- 0820 Anti-Far Right/ " " ; discouraging "
- O821 Pro-Far Left/radicals/Yippies/SDS; encouraging anarchy/ guerilla state
- 0822 Anti-Far Left/ " "; discouraging '
- 0823 Pro-Extremists (NA direction)/nuts/bomb-throwers
- 0824 Anti-Extremists " " "
- 0827 Pro-States'/local/community rights; better local

| 0828         | <pre>government Anti- " " " ; worse/weaker local government</pre>  |
|--------------|--|
| 0829         | For equality; believe everyone should have things equally/ be treated equally  |
| 0830         | Anti-equality; believe some people should have more than others/people should not be treated equally   |
| 0831<br>0832 | Generous, compassionate, believe in helping others Selfish, only help themselves   |
| 0833         | Acceptance of change/new ideas; less bound to status quo; more open to new ideas/ways of doing things; flexible, innovative  |
| 0834         | Resistance to change/new ideas; stick to (protect) status quo; resist new ways of doing things; rigid  |
| 0835         | Has a well-defined set of beliefs/definite philosophy; does not compromise on principles; has (clear) understanding of goals they stand for  |
| 0836         | Has poorly defined set of beliefs; lacks a definite philosophy; compromise on principles; has no (clear) understanding of goals they stand for   |
| 0837         | Favor work ethic; believes in self-reliance/in people working hard to get ahead  |
| 0838         | Doesn't favor work ethic; believes in people being handed things/in government handouts (if specific policy mentioned, code in 0900's)   |
| 0841         | <pre>Keep track of/control over administration heads, cabinet members, etc.; follow through on policies; determine if programs are working</pre>   |
| 0842         | Don't (as in 0841)   |
| 0843         | Conditional evaluation: R suggests candidate/party cannot solve problems because not under his/their control (no negative connotations); will he/they be able to do what they say (determining factor outside his/their control); "I like what he says but wonder if he can do it" (if clearly negative, code in 0122 or 0402) |
| 0845         | Will involve/wants to involve people/Congress/Cabinet/ advisors/other government officials in government/ decision making  |
| 0846         | Will not involve people/Congress/Cabinet/advisors/other government officials in government/decision making   |

# >> 1994 PARTY DIFFERENCES MASTER CODE

RESPONSES THAT REFER SPECIFICALLY TO THE CANDIDATES RATHER THAN PARTIES SHOULD BE CODED 910. However, if the candidates are referred to as leaders or representatives of the parties, the response should be coded with the appropriate code category.

### BROAD PHILOSOPHY

- LIBERAL RESPONSES

out-of-order.

001 More LIBERAL, progressive--too far left

- O10 ACCEPTANCE OF CHANGE/new ideas; less bound to status quo; more open to new ideas; new ways of doing things
- QUICK (RASH) RESPONSE TO PROBLEMS; tackle problems quickly; impetuous; impulsive; too aggressive; take more chances; not cautious enough
- 030 More extreme, RADICAL (NFS)
- O40 SOCIALISTIC; for welfare state; for social welfare programs; sensitive to social problems; leaves less to (interferes more with) private enterprise
- DEPENDS (TOO MUCH) ON FEDERAL GOVERNMENT (rather than state or local government); (too) centralized, paternalism; want Washington to do everything
- O60 DESTROY PERSONAL INITIATIVE/individual responsibility/individual dignity; recognize individual needs government help
- 070 FUTURE-ORIENTED; plan ahead; look to the future
- O85 FREEDOM TO DO AS ONE CHOOSES; less interested in strict control of social behavior; not interested in moral standards
- 086 Not religious; against prayer in school
- 090 Other broad philosophy--liberal

#### - CONSERVATIVE RESPONSES

- 100 More CONSERVATIVE/reactionary; too far right
- 110 RESISTANCE TO CHANGE/NEW IDEAS; stick to (protect) status quo; traditionalists; resist new ways of doing things; rigid
- 120 SLOW (CAUTIOUS) RESPONSE TO PROBLEMS; DO-NOTHING; lets things go
- 130 Moderate; middle of road (NFS); less extreme
- 140 For FREE ENTERPRISE capitalism; against socialism (code "help big business" under group references); unaware of social problems; for development of private enterprise; against expansion of government activities into areas of private enterprise
- FOR STATES' RIGHTS, local government; less interference from Washington at local level; against powerful federal government
- 160 INITIATIVE/responsibility/dignity of individual protected
- NOT FUTURE-ORIENTED; don't plan ahead; don't worry about the future
- DEFINITE MORAL STANDARDS/stands; concern for/control of public morality; upholds/fosters family values
- 186 (Good) Christian; strong religious beliefs; for prayer in school
- 190 Other broad philosophy--conservative

#### DOMESTIC POLICY REFERENCES

- FISCAL POLICY--EASY SPENDING RESPONSES
- 400 SPEND MORE FREELY/high spenders (NFS)
- 401 Spend much relative to what is accomplished; WASTEFUL, not careful with spending
- 402 Spend much relative to money available; spend us DEEPER IN DEBT; DEFICIT SPENDING
- 403 Spend under special circumstances, such as hard times
- 404 Bring cheap money; more money circulating
- 405 Other easy spending response
- 406 RAISE TAXES--NFS; keep taxes high; seek to increase government revenues
- Increse INCOME TAXES; will not cut income taxes; rely on increase in/high income tax to provide government revenues
  - FISCAL POLICY--CAUTIOUS SPENDING RESPONSES
- 500 SPEND LESS FREELY; economy in government (NFS)
- Spend little relative to what is accomplished; less wasteful/more careful with government (taxpayers') money
- 502 Spend little relative to money available; REDUCE DEBT, keep debt from getting higher, BALANCED BUDGET
- 503 Spend little even when special circumstances might warrant
- For sound money/tight money, deflation
- 505 Other cautious spending response
- 506 CUT TAXES--NFS; keep taxes low; seek to decrease government revenues
- 507 Cut INCOME TAXES; will not increase income taxes; rely on taxes other than income tax to provide government revenue
  - FISCAL POLICY--GENERAL SPENDING RESPONSES
- 591 General mention of taxes--neutral or NA direction
- 599 General mention of spending--neutral or NA direction
  - ASSOCIATION OF PARTY WITH GOOD/POSITIVE DOMESTIC SITUATIONS
- 411 Responsible promised (NA what); restraint on promises, realistic, doesn't promise too much
- Don't have (too much) government control over the economy; or lets BUSINESS GET MORE INVOLVED/handle problems of poverty/unemployment, etc.
- 413 (GOOD) GOVERNMENT CONTROL OF THE ECONOMY, business
- 415 Good for the nation's economy--general positive
- PROSPERITY in nation; good times for all, high national production, avoidance of depression, HIGH
- 431 Price INFLATION HELD IN CHECK; lower cost of living

- Propose/enact FAIR TAXES; believe everyone should be taxed the same/ that taxes should be even-
- Give tax breaks to the poor/working/middle class people; tax plicies favor the lower/middle classes
- LOCAL PERSONAL GOOD TIMES economically; head of family gets (keeps) better job (wages) when party is in power, family better off economically under this party (no direct government benefits like social security mentioned)
- 450 HONESTY AND INTEGRITY--characteristics of the party or administration (local or national), other similar characteristics of the party
- 451 One party has MORE EXPERIENCE, is better, smarter, more united
- 480 (Only) party has a philosophy/program/platform; stands for something
- 490 Other positive domestic associations
- 491 General mention of unemployment--neutral or NA direction
- 492 General mention of inflation--neutral or NA direction
- 493 General mention of economic policy/handling of the economy
  - GENERAL DOMESTIC POLICY RESPONSES
- 499 A domestic issue difference is cited which could be coded in the 400 or 500 series, but NA which
  - ASSOCIATION OF PARTY WITH BAD/NEGATIVE DOMESTIC SITUATIONS
- IRRESPONSIBLE PROMISES (NA what); promises too much; unrealistic, pie-in-the sky; can't fulfill promises
- Have (too much) govt control over the economy; or does not let busi-ness get more involved/handle problems of poverty/unemployment, etc.
- 513 (POOR) GOVERNMENT CONTROL OF THE ECONOMY
- 515 Bad for the nation's economy, general negative reference
- 520 Hard times, depression in nation, much unemployment, low (over) production
- 531 Create/does not control price INFLATION; high cost of living in nation
- Propose/enact UNFAIR TAXES; show favoritism/give tax breaks to certain groups or types of people
- Give tax breaks to the wealth/corporations; tax policies favor the rich/powerful/upper classes
- LOCAL/PERSONAL HARD TIMES economically; head of family gets laid off (poorer wages) when party is in power; family worse off economically under this party
- Dishonesty/corruption (nepotism, graft, patronage) of party or administration (local or national); other similar characteristics of the party; Watergate
- 551 One party has LESS EXPERIENCE/is worse/not as smart; party is not (is less) unified

```
580
      Party has no philosophy/programs/platform; doesn't
      stand for anything
590
      Other negative domestic association with party
  - SPECIFIC DOMESTIC POLICIES FAVORED BY PARTY
      MINIMUM WAGE legislation; favors raising minimum
      wage, or favors raising UNEMPLOYMENT COMPENSATION
601
      Social Security; government pension raises
610
     MEDICAL (HEALTH) INSURANCE; medical card for aged;
      socialized medicine; medicare
612
      HOUSING; aid to the homeless
620

784
     Homosexual/gay rights
```

### 790 Other specific domestic policy opposed

#### FOREIGN POLICY REFERENCES

- 800 WAR; get us into war (faster); party associated with war; militarist
- PEACE; more likely to keep peace; party associated with peace
- 820 INTERNATIONALIST; more for foreign aid, government activities abroad; cooperate with allies, U.N.; "more for foreign aid/trade"
- 825 Foreign aid/trade, NA direction
- ISOLATIONIST; avoid foreign activities; cut foreign aid (military or economic); "cut foreign aid/trade"
- NATIONAL SECURITY; for strong national defense (spending); strong (firm) (too aggressive) posture toward communism (Russia); too much defense spending
- National defense--general, NA or neutral direction
- INADEQUATE NATIONAL SECURITY; fail to maintain (spend for) defense; weak posture toward communism (Russia)
- 860 Specific TROUBLE SPOTS
- 870 CONTROL OF NUCLEAR WEAPONS
- 880 Strong FOREIGN POLICY
- 881 Weak foreign policy
- 884 SPACE; space policy
- Other foreign policy--other substantive foreign policy mentions (direction of response usually indicated)
- Mention of "foreign policy" difference but no substance or direction given (e.g., usual response is "the two parties or candidates differ on foreign policy, on how they will handle foreign policy")

### MISCELLANEOUS AND NO PARTY DIFFERENCES RESPONSES

- 900 Miscellaneous other party differences
- 901 (Only) one party is more successful than the others; wins elections; is (is not) majority party, etc.
- 902 (Only) one party is less successful than the others; doesn't win elections much; is the minority party
- 910 PERSONALITY/CANDIDATE ONLY MENTIONS--candidate is dangerous, fanatic, aggressive, courageous, honest, untrustworthy, impulsive, outspoken, firm, dishonest, negative, lack of integrity, bad politician, etc. (but code 371 racist, prejudiced, bigoted)
- 920 Reference to probable inability to get things done, e.g., gain congressional support
- 930 LEADERSHIP MENTIONS—a good (bad) leader, is head of the party (R must specifically mention the candidate as leader or head of the party), or one party has better leadership than another
- 980 The parties are different; EVERYTHING ABOUT THEM IS DIFFERENT (NA what the differences are)

## NO DIFFERENCE ("NO" OR "DK")

| 991 | There used to be differences, but not now  |
|-----|--|
| 992 | Indicate dissatisfaction with the lack of differences  |
| 993 | Favorable to both parties, e.g., both parties are seeking to serve the people                      |
| 994 | Indicates that individual candidates are more important than parties anyhow                        |
| 995 | Unfavorable to both parties, e.g., both parties are just after money                               |
| 996 | On variation within parties  |
| 997 | Other comments   |
| 998 | DK (Code in 1st var only)  |
| 999 | NA (Code in 1st var only)  |
| 000 | No party differences ("No" or "DK" and no further comment); no further second or third differences |

### (\* 2 Senate races)

#### >> 1994 CITY MASTER CODE

This list was developed from the 1973 WORLD ALMANAC AND BOOK OF FACTS, pp. 152-188 (1970 population figures).

- The first four digits are a unique code number for each city.
- The fifth digit is the urbanicity code for each city, as used in the 1971 Quality of Life study:
  - 1 = City of over 1,000,000
  - 2 = City of over 25,000 and up to 250,000 in an SMSA of 1,000,000 or more[1]
  - 3 = City of under 25,000 in an SMSA of 1,000,000 or
  - 4 = City of over 250,000 and up to 1,000,000
  - 5 = City of over 50,000 and up to 250,000 not in SMSA of 1,000,000 or more
  - 6 = City of 50,000 or less not in SMSA of 1,000,000 or more
  - 9 = NA
- [1] The two 1970 STANDARD CONSOLIDATED AREAS (New York-Northeastern New Jersey, and Chicago, Ill.-Northwestern Indiana), the remaining 1970 SMCA's of one millian or more, plus the Anaheim-Santa Ana-Garden Grove, CA SMSA (which was attached to the Los Angeles SMSA).

Asterisk (\*) indicates place added in 1982 (having population of 25,000+ in 1980 census) coded on basis of 1970 status in area. (See example Chandler, Arizona -- it's SMSA was not over one million in 1970, so coded 6 here. This was done to avoid glaring inconsistencies in adjacent areas. The areas affected by this decision are the four places where the population of the SMSA topped the one million mark between 1970 and 1980 (Phoenix, Arizona; San Antonio, Texas; Ft. Lauderdale/Hollywood, Florida; Sacramento, California).
