

501244 THCASI.THGRASIAN

The next set of questions uses the same thermometer scale which you used earlier in the interview. Ratings between 50 degrees and 100 degrees mean that you feel favorable and warm toward the group. Ratings between 0 degrees and 50 degrees mean that you don't feel favorable toward the group and that you don't care too much for that group. You would rate the group at the 50 degree mark if you don't feel particularly warm or cold toward the group.

On the feeling thermometer scale of 0 to 100, how would you rate Asian-Americans?
