

**[FIRST DRAFT]  
2020 Time Series  
Post-Election Questionnaire**

January 12, 2021

This draft questionnaire is being provided so that the ANES user community is informed as to the questions that appeared in the post-election survey for the ANES 2020 Time Series study.

Please note that the draft questionnaire is a preliminary version and lacks some of the quality control and documentation that will benefit future versions of the questionnaire.

When reviewing the questionnaire, please keep in mind that:

- Some items in the questionnaire are labeled as being for the “face-to-face (FTF)” mode. However, in-person interviewing was not used in the 2020 study, due to the COVID-19 pandemic, and references to “FTF” should be instead be interpreted as being the “interviewer-administered” mode (that is, by videoconference or telephone).
- The questionnaire focus is on the interviewer-administered version of the questionnaire. However, questions were modified as necessary to accommodate other modes such as online interviewing. An example of such a modification would be removing references to participant/respondent booklets.
- Except for the CASI (Computer-Assisted Self-Interview) section and some open-ended items, interviewers in the interviewer- administered mode could accept “don’t know” options from respondents.
- Because the interviewer-administered instrument was conducted by phone and videoconference rather than in person, the CASI section was also administered directly by the interviewer with all questions read aloud and all answers also provided aloud directly from the respondent to the interviewer.
- The draft questionnaire provides section and item names to uniquely identify the questions that were asked in the post-election study, but the variable names that will appear in the dataset when the data are eventually released will be named differently.
- Unless the label for a question indicates otherwise, the question was asked in all survey modes (web, phone, and videoconference).

We hope you find this draft questionnaire to be useful. We would appreciate being notified of any errors by email to: [anes@electionstudies.org](mailto:anes@electionstudies.org)

Thank you!

## Office recall - commit to not look up answers

Now we have a set of questions concerning various public figures.

We are interested in the guesses people make when they do not know the answer to a question. We will ask you about several public figures. Some may be easy, but others are meant to be so difficult that you will have to guess.

In fact, for some of these questions, if you answer correctly, we will know that you probably looked up the answer.

Please do not look up the answers you do not know. Instead, please just make your best guess.

Will you please promise to try your best without looking up any answers? Or do you not want to make that promise?

1. I promise to try my best without looking up any answers
2. I do not want to make that promise

I'd like to get your feelings toward some of our political leaders and other people who are in the news these days. I'll read the name of a person and I'd like you to rate that person using something we call the feeling thermometer.

Ratings between 50 degrees and 100 degrees mean that you feel favorable and warm toward the person. Ratings between 0 degrees and 50 degrees mean that you don't feel favorable toward the person and that you don't care too much for that person. You would rate the person at the 50 degree mark if you don't feel particularly warm or cold toward the person.

If we come to a person whose name you don't recognize, you don't need to rate that person. Just tell me and we'll move on to the n

## CASI POST: STEREOTYPE HARDWORKING INTRO

Now we have some questions about different groups in our society. We're going to show you a seven-point scale on which the characteristics of the people in a group can be rated. In the first statement a score of '1' means that you think almost all of the people in that group tend to be 'hard-working.' A score of '7' means that you think most people in the group are 'lazy.' A score of '4' means that you think that most people in the group are not closer to one end or the other, and of course, you may choose any number in between.
