I have here a card (INTERVIEWER HANDS OVER CARD) on which there is something that looks like a thermometer. We call it a "feeling thermometer" because it measures your feelings towards groups. 

Here's how it works. If you don't know too much about a group, or don't feel particularly warm or cold toward them, then you should place them in the middle, at the 50 degree mark. 

If you have a warm feeling toward a group, or feel favorably toward it, you would give it a score somewhere between 50° and 100° depending on how warm your feeling is toward the group. 

On the other hand, if you don't feel very favorably toward some of these groups—if there are some you don't care for too much—then you would place them somewhere between 0° and 50°. 

Our first group is the farmers. Where would you put them on the thermometer? 

INTERVIEWER: TAKE SOME TIME TO EXPLAIN HOW THE THERMOMETER WORKS, SHOWING THE WAY IN WHICH THE DEGREE LABELS CAN HELP HIM TO LOCATE THE GROUP.
