VARIABLE ENTRIES

This file should be opened in fixed font, 10 pitch or smaller. Codebook introductory material and appendix material are in separate files.

NOTE ON VARIABLE NAMING:

The variable name references used in NES Study codebooks do not include the "V" prefix found in all variable names used within the released SAS and SPSS data definition files (.sas and .sps files).

For example, "VAR 920001" and "VAR VERSION" in Study codebooks refer to V920001 and VVERSION in the study data definition files.

VARIABLE 'NUMBERING':

'Numbered' variables in NES timeseries datasets and in Pilot datasets (except the 1998 Pilot) comply with the following format:

2-digit year prefix + 4 digits + [opt] 1-char suffix.

Examples: 1978 Post variable V780002; 1983 Pilot variable V832101. Note that for datasets including data from multiple studies, the 2-digit year prefix corresponds to the appropriate study year to which the variable is associated; for example, the 1983 Pilot dataset also includes 1982 timeseries variables, for which the 2-digit prefix is 82.

Non-time-series studies other than Pilots use 2-character mnemonic prefixes, for example variable VPS0048 in the 1988-1990-1992 Pooled Senate Study dataset.

SPECIAL NOTE ON COLUMN LOCATIONS:

Some numeric variables use coding schemes that allow for code values having a varying number of digits. In such instances, the number of columns corresponding to the variable in the data file [.dat file] and in the column specifications will be the width of the maximum value occurring in the actual data, rather than the maximum width allowable by the coding scheme. For example, if codes 01-12 are allowed for a numeric variable but all values in the data are less than 10, then the number of columns corresponding to the variable within the ASCII data file will be 1.

In our studies over the years we have collected some ideas different people have about the sorts of things the government in Washington should or should not be doing. I will read you a statement which contains two different ideas. If you aren't very interested in either of the ideas, we will go on to the next question. Take the first question:

Q.15. "Some people think the government in Washington should help towns and cities provide education for grade and high school children; others think that this should be handled by the states and local communities." Have you been interested enough in this to favor one side over the other.
Q. 15A. (IF YES) WHICH ARE YOU IN FAVOR OF:

3. (YES) OTHER, DEPENDS, BOTH BOXES CHECKED
5. (YES) HANDLING IT AT THE STATE AND LOCAL LEVEL

WEIGHTS MUST BE USED WHEN WORKING WITH THE NEGRO SUPPLEMENT
AND CROSS SECTION SAMPLES TOGETHER. IN THIS COMBINED FILE,
ALL WHITE RESPONDENTS ARE WEIGHTED "3" AND ALL NEGRO
RESPONDENTS ARE WEIGHTED "1", YIELDING A RAW N OF 1834, AND A
WEIGHTED N OF 4658.

WEIGHTS ARE NOT NEEDED WHEN WORKING WITH:

A) THE NATIONAL CROSS SECTION SAMPLE ALONE. THIS
SAMPLE IS SELF-WEIGHTING--ALL R'S WEIGHTED "1",
YIELDING AN N (ALWAYS RAW) OF 1571.

OR

B) A NEGRO FILE OBTAINED BY SUBSETTING ALL NEGRO
RESPONDENTS FROM THE COMBINED FILE MENTIONED ABOVE.
THIS NEGRO SAMPLE IS ALSO SELF-WEIGHTING, YIELDING
AN N (ALWAYS RAW) OF 422.

NOTE: NO OTHER SUBSET OF THESE RESPONDENTS YIELDS A VALID
SAMPLE (E.G., THE NEGRO SUPPLEMENT ALONE IS NOT A VALID
SAMPLE, AND SHOULD NOT BE USED AS SUCH).
