3. List of 1991 Pilot Study Reports

□>> CODEBOOK INFORMATION

The following example from the 1948 NES study provides the standard format for codebook variable documentation.

Note that NES studies which are not part of the Time-Series usually omit marginals and the descriptive content in lines 2-5 (except for variable name).

Line

```
1 =====
2 VAR 480026   NAME-R NOT VT-WAS R REG TO VT
3             COLUMNS 61   - 61
4             NUMERIC
5             MD=0 OR GE 8
6
7             Q. 17.  (IF R DID NOT VOTE)  WERE YOU REGISTERED (ELIGIBLE)
8             TO VOTE.
9             .....
10
11             82           1.  YES
12             149          2.  NO
13
14             0           8.  DK
15             9           9.  NA
16             422          0.  INAP., R VOTED
```

Line 2 - VARIABLE NAME. Note that in the codebook the variable name (usually a 'number') does not include the "V" prefix which is used in the release SAS and SPSS data definition files (.sas and .sps files) for all variables including those which do not have 'number' names. For example the variable "VERSION" in the codebook is "VVERSION" in the data definition

anes_mergedfile_1990to1992_intro_codebook.txt
files.

- Line 2 - "NAME". This is the variable label used in the SAS and SPSS data definition files (.sas and .sps files). Some codebooks exclude this.
- Line 3 - COLUMNS. Columns in the ASCII data file (.dat file).
- Line 4 - CHARACTER OR NUMERIC. If numeric and the variable is a decimal rather than integer variable, the number of decimal places is also indicated (e.g. "NUMERIC DEC 4")
- Line 5 - Values which are assigned to missing by default in the Study's SAS and and SPSS data definition files (.sas and .sps files).
- Line 7 - Actual question text for survey variables or a description of non-survey variables (for example, congressional district). Survey items usually include the question number (for example "Bla.") from the Study questionnaire; beginning in 1996 non-survey items also have unique item numbers (for example "CSheet.1").
- Line 9 - Adashed or dotted line usually separates question text from any other documentation which follows.
- Line 10- When present, annotation provided by Study staff is presented below the question text/description and preceding code values.

Lines 11-16
Code values are listed with descriptive labels. Valid codes (those not having 'missing' status in line 5) are presented first, followed by the values described in line 5. For continuous variables, one line may appear providing the range of possible values. A blank line usually separates the 'valid' and 'missing' values.

Lines 11-16
Marginals are usually provided for discrete variables. The counts may be unweighted or weighted; check the Study codebook introductory text to determine weight usage.
