     I'd like to get your feelings toward some of our political leaders and
     other people who are in the news these days.  I'll read the name of a
     person and I'd like you to rate that person using something we call the
     feeling thermometer.  Ratings between 50 degrees and 100 degrees mean
     that you feel favorable and warm toward the person.  Ratings between 0
     degrees and 50 degrees mean that you don't feel favorable toward the
     person and that you don't care too much for that person.  You would rate
     the person at the 50 degree mark if you don't feel particularly warm or
     cold toward the person.  If we come to a person whose name you don't
     recognize, you don't need to rate that person.  Just tell me and we'll
     move on to the next one. (INTERVIEWER USE "DON'T KNOW" IF DON'T

         QUESTION TIMINGS

      Question timings are the timings exactly as recorded by the
      CATI application.  In a few cases, presence of missing data
      in a timing variable may not correspond to INAP in the
      question data (or vice versa) to slight irregularities
      in the recording process.

      All missing data in timing variables are coded 0.

      Note: timings for section M questions follow timings for
      section L; this varies from the questionnaire, in
      which section M follows section P.
