Project Implicit is a virtual laboratory for research and education in the social and behavioral sciences, especially for research in implicit social cognition. With a staff of research scientists, developers, and technicians, Project Implicit is working toward (a) methodological innovation to increase the viability of psychological research on the Internet, (b) building software to make web-based research more accessible to scientists, (c) providing impetus for methodological and theoretical innovation in implicit social cognition, and (d) disseminating basic psychological research worldwide through description and interactive demonstration. Project Implicit is a collaboration of research laboratories at Harvard University, the University of Washington, and the University of Virginia.
