

# ANES 2020 Pre-Election Study

## Combined Screener, WMS, and Video Documentation

### Start Logic

[PROGRAMMING: Define preload variable SAMPLE for all cases.

SAMPLE=1 for the GSS cases. Individuals are preselected but we do not know the name or address.

SAMPLE=2 for the web 2016 re-interview cases. Individuals are preselected and we know the address, but the address could be incorrect in some cases.

SAMPLE=3A for the web fresh cases, Stanford sample. An address is selected but the individual is not preselected. Web mode only, video and phone never offered.

SAMPLE= 3B for the fresh sample web cases, eventually offered phone. (Michigan sample, formerly face-to-face.) An address is selected but the individual is not preselected.

SAMPLE= 3C for the fresh sample web cases, first offered video, then web, and eventually offered phone. (Michigan sample, formerly face-to-face.) An address is selected but the individual is not preselected.]

[TIMING: record all item times]

[ITEM NON-RESPONSE: Do not allow nonresponse to any item unless the item is marked "ALLOW NONRESPONSE." If the respondent tries to advance the survey without responding to an item, display the prompt "Please answer this question to continue."]

Status: The default Screener Status = NS (NOT STARTED) and is set by the WMS. When the screener is launched for the first time, set SCREENER STATUS = IP (IN PROGRESS).

Formatting: Use bolded text for question text. Use normal text for response options.

Textbox lengths should reflect the character length for first name, last name, phone number, zip code, email, etc, rather than use the full width of the screen.

Use an input mask for phone number with format ###-###-####.

### Start Logic

[NOTE: Participants may start by typing in a URL for our manual login screen, probably anes.stanford.edu, or by clicking a personalized link (a URL with embedded credentials) sent to them in email.

IF SAMPLE= 3A, 3B, or 3C (Fresh sample), the R will type the login URL to start at Login.

IF SAMPLE=2 (Web 2016) and the R types the login URL, start at Login.

IF SAMPLE=2 (Web 2016) and the R clicks a personalized URL, start at S2.

IF SAMPLE=1 (GSS) and the R types the login URL, start at Login.

IF SAMPLE=1 (GSS) and the R clicks a personalized URL, start at location indicated by login logic.

### **S107a. Consent**

Welcome to the American National Election Studies. You have been scientifically selected to be part of this special way of finding out what Americans think about life in the United States today.

This research study is sponsored by Stanford University and the University of Michigan. Participation is voluntary and you may decline to answer any questions you do not want to answer. The survey usually takes about an hour. Your answers will be combined with other participants' answers to make a data file that will be shared with other researchers and used for future research. Your individual privacy will be maintained in all published and written data resulting from the study.

If you are not satisfied with how this study is being conducted, or if you have any concerns, complaints, or general questions about the research or your rights as a participant, please contact the Stanford Institutional Review Board (IRB) to speak to someone independent of the research team at 650-723-2480 or email at [IRB2-Manager@lists.stanford.edu](mailto:IRB2-Manager@lists.stanford.edu). You can also write to the Stanford IRB, Stanford University, 1705 El Camino Real, Palo Alto, CA 94306.

The call center status indicator is variable, depending on interviewer availability and call center hours:

If interviewers are online, the below message will display, with the wait time variable depending on interviewer status:

If interviewers are readily available the waiting time will display as “just a couple minutes.”

If interviewers are online, but not available, there are 5 minute ranges displayed (e.g. 5-10, 10-15, etc).

The range is calculated by calculating the difference of the estimated completion time for the interview (100 minutes) and the time each active interviewer has been in their zoom session. An additional 5 minute overhead is included for post-interview tasks. Each interviewer has a uniquely calculated time. The value shown to the participant is based on their queue index, with the first one in the queue shown the time from the interviewer that will be available next, the second in the queue the second least amount. If there are more in the queue than actual online interviewers, it returns to the first interviewer, and adds the interview time to that value.

If no interviewers are logged in as available:

 No interviewers are online at this time

If outside of call center hours:

 Call center is closed now

The refresh icon allows respondents to refresh the page, which refreshes wait time and connection status.

Clicking on “click here” will show the following pop-up, which provides links with instructions on how to download Zoom on different devices. The message also contains the help desk number that respondents can call for assistance with downloading, starting, and connecting Zoom.

If you do not have Zoom loaded on your device and need more information [click here](#).

The image shows a screenshot of a web page with a central pop-up window. The pop-up has a light blue background and a white border. It contains the following text:

Thank you for participating. You can do the Zoom interview on many kinds of devices with a camera and microphone:

**Windows desktop and laptop computers:** just follow our links to do the interview and you will be prompted to get Zoom. (Or, if you'd rather install it now, [click here](#).)

**Android phones and tablets:** Zoom is free to download in Google Play.  
[https://play.google.com/store/apps/details?id=us.zoom.videomeetings&hl=en\\_US](https://play.google.com/store/apps/details?id=us.zoom.videomeetings&hl=en_US)

**Apple iPhone and iPad:** it's usually easier to install the Zoom app ahead of time. Click to get the free download from the App Store:  
<https://apps.apple.com/us/app/zoom-cloud-meetings/id546505307>

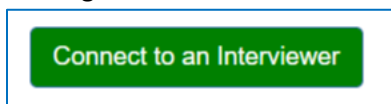

**Apple Mac:** It's usually easier to install ahead of time. Here's how: <https://support.zoom.us/hc/en-us/articles/203020795-How-To-Install-on-Mac>

**If you need help getting connected, or if your device does not have a microphone and a camera, please call us at the number in your invitation letter: 1-855-933-4458. Our friendly staff will talk you through the steps to connect. Connecting often takes about 3 minutes.**

At the bottom of the pop-up is a small blue button labeled "Close".

In the background, parts of the web page are visible, including a red heading "No interviewers are available", a "Connect to an Interviewer" button, and a "Appointment" section.

Clicking "Connect to an Interviewer" will route the respondent to the interview queue screen.

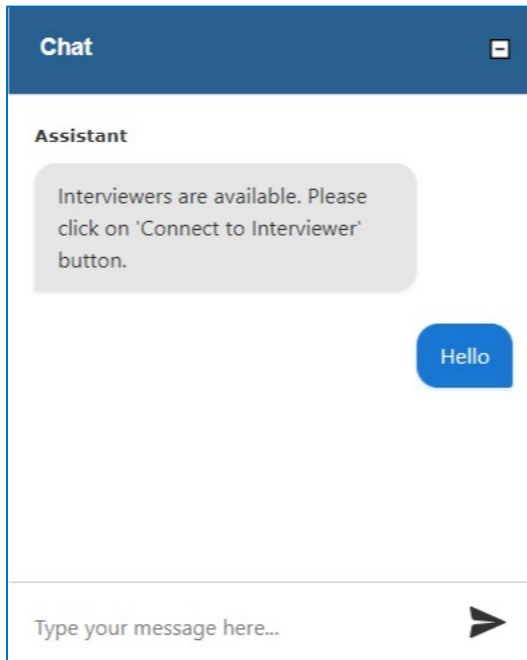

The call center times are responsive to the time zone of the respondent's device. For example, if respondent is in California, the message would say "Please note times in Pacific Time Zone" with the times being in PT.

**Please note times in Eastern Time Zone:**  
Weekdays: 9am to 12am  
Saturday: 10am - 6pm  
Sunday: 2pm to 10pm.

The message at the bottom of the screen provides the email and phone number for Westat's help desk that will provide tech support and answer questions for respondents.

For additional help or questions, please contact the study help desk at [anes2020help@stanford.edu](mailto:anes2020help@stanford.edu) or call our helpdesk at 1-855-933-4458.

The chat icon shows only when interviewers are online. Clicking on it will display the below chat box, and allow respondents to begin chatting with available interviewers. Interviewers may also initiate chats with respondents.

Respondents may create an appointment reminder by selecting a preferred time and entering an email and phone number. The available appointment times are restricted by call center hours, and are responsive to the respondent's time zone. An automatic email is sent to the respondent's email confirming their appointment time after the appointment is made.

### Schedule Interview Appointment

Please enter the date and time you would like to do the interview, along with your email address and phone number, and click the **Schedule Appointment** button. We will send you a confirmation now and a reminder before your interview.

**Preferred Time (Eastern Time Zone):**

  
**Email address:**

**Phone number:**

After the respondent has created an appointment, the appointment time is displayed on right side of the screen, and the respondent may click "Change" to edit the appointment time. The respondent may also decide to connect to an interviewer prior to the appointment time, but clicking "Connect to an interviewer."

#### Interview Time Selected

You have selected the following time for an interview. We have sent you a confirmation email with a link to this page. A reminder email will be sent before your interview time. The reminder email will come from anes2020@westat.com.

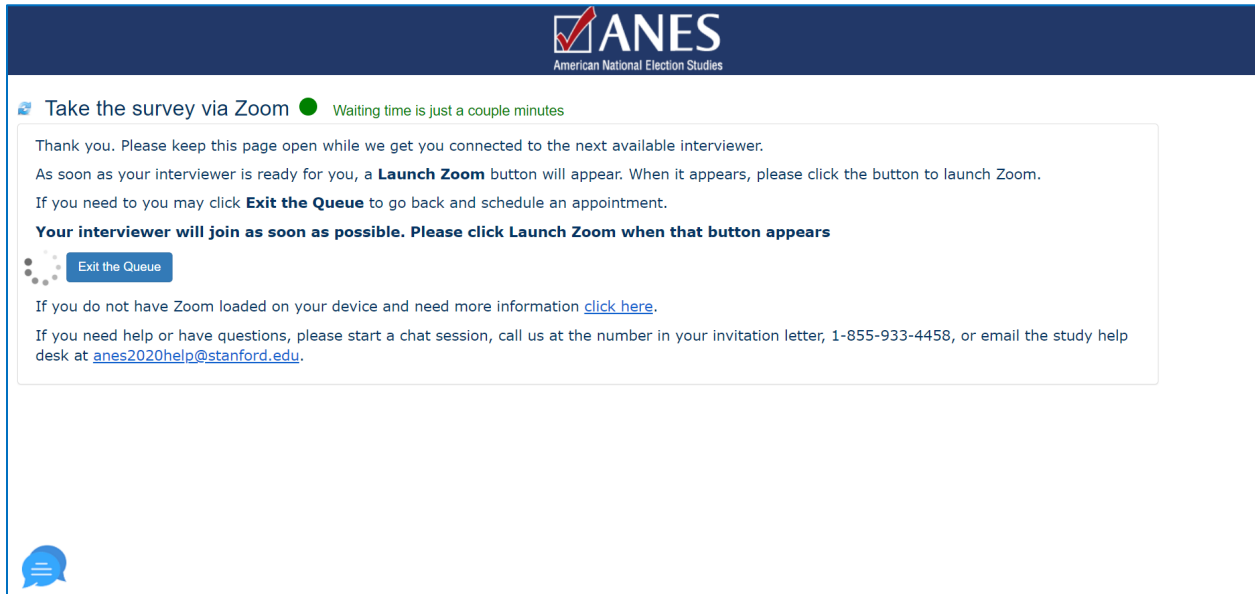

**Thank you.** We are looking forward to talking to you.

**Scheduled Time:** 08/27/2020 05:00 PM  
**Email:** test@gmail.com  
**Phone number:** 1111111111

Please note times in Eastern Time Zone:  
Weekdays: 9am to 12am  
Saturday: 10am - 6pm  
Sunday: 2pm to 10pm.

For additional help or questions, please contact the study help desk at [anes2020help@stanford.edu](mailto:anes2020help@stanford.edu) or call our helpdesk at 1-855-933-4458.

The interview Queue screen is displayed after “Connect to an Interviewer” is selected. The status indicator continues to display (in the below example, interviewers are online and available).

While the respondent is on the queue screen, the system connects an available interviewer. Once ready, the respondent will receive a message to connect, which provides an invitation link to the Zoom meeting to begin the interview.

Meanwhile, the interviewer can connect to the Zoom meeting, as well as launch the Pre instrument.
